The Nature Of Interest Groups Section 1 Quiz Key:

The Europeanization of Interest Groups in Malta and Ireland Mario Thomas Vassallo, 2016-04-29 This comparative work examines the political and social context of interest groups in Malta and Ireland two small island states at the periphery of an integrated continent The author explores the impact of the European Union on their civil society s organizations and their gradual transformation at differing speeds and logics of Europeanization

Political Parties and Interest Groups in Norway Elin Haugsgjerd Allern, 2024-10-31 How do today s political parties relate to other organisations Do they prefer rather distant relationships with a wide range of interest groups or have they virtually detached themselves from civil society altogether Scholars seem to agree that traditionally close relationships such as those between social democratic parties and trade unions have grown weaker since the 1960s But to date only limited systematic research has been conducted While parties and interest groups attract a great deal of attention from political scientists the links between them have been largely overlooked This book is an attempt to bridge the gap starting from the party side of the relationship It throws new light on the topic by presenting a theory driven comprehensive study of Norway s seven major political parties and their relationships with interest groups at the beginning of the new millennium Based on original and extensive data including party documents in depth interviews with key players and a survey of national party elites Elin Haugsgjerd Allern paints a nuanced picture of the nature and significance of these relationships and the factors that shape them A major conclusion is that Norway s parties tend to maintain rather distant but wide ranging relationships with interest groups today However some parties still have fairly strong links with their traditional associates and a narrower network of links with other groups Hence Allern also shows that significant differences exist between parties that are apparently exposed to the same social political and institutional environment

Stealing the State Steven Lee Solnick, 1998 Solnick argues that the Soviet system fell victim not to stalemate at the top nor to revolution from below but to opportunism from within In case studies on the Communist Youth League the system of job assignments for university graduates and military conscription he tells the story from a new perspective testing Western theories of reform

The Death Penalty Roger Hood CBE QC (Hon) DCL FBA, Carolyn Hoyle, 2008-03-27 The 4th edition of this authoritative study of the death penalty now written jointly with Carolyn Hoyle brings up to date developments in the movement to abolish the death penalty worldwide It draws on Roger Hood s experience as consultant to the United Nations for the UN Secretary General s five yearly surveys of capital punishment and on the latest information from non governmental organizations and the academic literature Not only have many more countries abolished capital punishment

but even amongst those that retain it the majority have been carrying out fewer executions Legal challenges to the mandatory capital punishment have been successful as has the pressure to abolish the death penalty for those who commit a capital crime when under the age of 18 This edition has more to say about the prospects that China will restrict and control the number of executions on the road to abolition Yet despite such advances this book reveals many human rights abuses where the death penalty still exists In some countries a wide range of crimes are still subject to capital punishment and the authorities too often fail to meet the safeguards embodied in international human rights treaties to safeguard those facing the death penalty There is evidence of police abuse unfair trials lack of access to competent defence counsel excessive periods of time spent on in horrible conditions on death row and public painful forms of execution The authors engage with the latest debates on the realities of capital punishment especially its justification as a uniquely effective deterrent whether it can ever be administered equitably without discrimination or error and what influence relatives of victims should have in sentencing and on the public debate For the first time it also discussing the problem of devising an alternative to capital punishment especially life imprisonment without the possibility of parole
