Vaccines and immunotherapy against fungi: the new frontier Joshua D. Nosanchuk, Carlos P. Taborda, Invasive fungal diseases have increased many fold over the past 50 years Current treatment regimens typically require prolonged administration of antifungal medications that can have significant toxicity Moreover our present potent antifungal armamentarium fails to eradicate fungal pathogens from certain compromised hosts Additionally invasive fungal diseases continue to have unacceptably high mortality rates A growing body of work has focused on the utility of vaccines and or

TESTING AND DIAGNOSIS TIMELY Yes indeed it is Testing and Diagnosis is an important topic and fulfills a vital need for the electronic industry The testing and diagnosis of digital electronic circuits has been successfully developed to the point that it can be automated Unfortunately its development for analog electronic circuits is still in its Stone Age The engineer's intuition is still the most powerful tool used in the industry There are two reasons for this One is that there has been no pressing need from the industry Analog circuits are usually small in size Sometimes the engineer's experience and intuition are sufficient to fulfill the need The other reason is that there are no breakthrough results from academic research to provide the industry with critical ideas to develop tools This is not because of a lack of effort Both academic and industrial research groups have made major efforts to look into this problem Unfortunately the problem for analog circuits is fundamentally different from and much more difficult than its counterpart for digital circuits These efforts have led to some important findings but are still not at the point of being practically useful However these situations are now changing The current trend for the design of VLSI chips is to use analog digital hybrid circuits instead of digital circuits from the past Therefore even Ix x Preface though the analog circuit may be small the total circuit under testing is large **America**
