MotorBoating ,2011-05 **Life-cycle Analysis of Energy Systems** Bent Sørensen,2011 Life cycle assessment of new energy solutions plays an important role in discussions about global warming mitigation options and the evaluation of concrete energy production and conversion installations This book starts by describing the methodology of life cycle analysis and life cycle assessment of new energy solutions It then goes on to cover in detail a range of applications to individual energy installations national supply systems and to the global energy system in a climate impact context Coverage is not limited to issues related to commercial uses by consultants according to ISO norms It also emphasizes life cycle studies as an open ended scientific discipline embracing economic issues of cost employment equity foreign trade balances ecological sustainability and a range of geo political and social issues A wealth of applications are described and a discussion on the results obtained in each study is included Example areas are fossil and nuclear power plants renewable energy systems and systems based on hydrogen or batteries as energy carriers The analysis is continued to the end users of energy where energy use in transportation industry and home are scrutinized for their life cycle impacts Biofuel production and the combustion of firewood in home fireplaces and stoves are amongst the issues discussed A central theme of the book is global warming The impacts of greenhouse gas emissions are meticulously mapped at a depth far beyond that of the IPCC reports A novel and surprising finding is that more lives will be saved than lost as a direct consequence of a warmer climate After a 2oC increase in temperature the reduction in death rates in areas with cold winters would outweigh the increase in the death rates in hot climates However this is only one of several impacts from greenhouse gases and the remaining ones are still overwhelmingly negative The fact that some population groups may benefit from higher temperatures notably the ones most responsible for greenhouse gas emissions whilst others who did not contribute much to the problem suffer is one of the main points of the book The book is suitable as a university textbook and as a reference source for engineers managers and public bodies responsible for planning and licensing **Plunkett's Renewable, Alternative & Hydrogen Energy Industry Almanac 2009** Jack W. Plunkett,2009 There are few industry sectors in the world today with more potential than renewable and hydrogen energy Clean green and renewable energy technologies are receiving immense emphasis from investors

Coopetition Strategy Giovanni B. Dagnino, Elena Rocco, 2009-09-10 This innovative book portrays the state of the art of coopetition strategy regarded as a compelling mindset to exploit entirely the potential of actors interdependencies firms governments suppliers customers scientists and partners in

today's global scenarios. It provides the rudiments for navigating an exploration journey into a virtually new and emergent management subfield. This volume presents three key distinctive features: it is the first attempt that delves systematically and rigorously into coopetition strategy and coopetitive behaviour; it clearly elucidates the contribution of coopetition to the advancement of strategic management and managerial practice; it is the outcome of the collective brains of several scholars with diverse geographical roots and backgrounds who cultivate original research on coopetition strategy from a variety of perspectives: economic, managerial, political, and multiple methods theory building, game theoretical, experimental, and inductive case based inquiries. Looking into this volume, the reader will realize that while the topic is at the beginning of its lifecycle, coopetition strategy has touched an important crossroads which solicits a more comprehensive and systematic assessment. If mindfully formulated and implemented, this hybrid strategic option is able to increase returns and generate value for shareholders, entrepreneurs, managers, and coopetitors. *Libertatem Magazine*, 2015-10-15
