The Laws and Economics of Confucianism Taisu Zhang, 2017-10-12 Tying together cultural history legal history and institutional economics The Laws and Economics of Confucianism Kinship and Property in Preindustrial China and England offers a novel argument as to why Chinese and English preindustrial economic development went down different paths The dominance of Neo Confucian social hierarchies in Late Imperial and Republican China under which advanced age and generational seniority were the primary determinants of sociopolitical status allowed many poor but senior individuals to possess status and political authority highly disproportionate to their wealth In comparison landed wealth was a fairly strict prerequisite for high status and authority in the far more individualist society of early modern England essentially excluding low income individuals from secular positions of prestige and leadership Zhang argues that this social difference had major consequences for property institutions and agricultural production The Great Wall of China Louise Chipley Slavicek, 2009 This series examines the key consequences of arbitrary border making in world history past and present These studies describe arbitrary borders as places where people interact differently from the way they would had the boundary not existed Analytical but easy to read these brief histories will appeal to a broad sweep of readership Great Game On Geoff Raby, 2024-11-12 Great Game On is the story of the remaking of the world order Historically China has sought its security by building dominant relationships with pliant states that accept its pre eminence Its expanding role and influence in Central Asia has been as incremental and piecemeal as it has been deliberate Without firing a shot China could potentially end the United States international primacy to become the most consequential global power With its emergence as the leading power in Eurasia based on its inexorable economic rise and Putin's folly in Ukraine China has been released from its past existential anxieties about land based threats from Eurasia It now has the chance to project its power globally as the US did from the early twentieth century when it became the dominant power in the western hemisphere What threats and risks must China address And what happens when China becomes the established stable dominant power in Eurasia Australia's former ambassador to China Geoff Raby takes the reader on a journey across Eurasia to understand the forces shaping its geopolitics Raby enriches this analysis by weaving his own travel stories experiences and adventures into the fabric of his narrative This book is geopolitics on a grand canvas written from the ground up **Day of Empire** Amy Chua, 2009-01-06 In this sweeping history bestselling author Amy Chua explains how globally dominant empires or hyperpowers rise and why they fall In a series of brilliant chapter length studies she examines the most powerful cultures in history from the ancient empires of Persia and China to the recent global empires of England and the United States and reveals the reasons behind their success as well as the roots of their ultimate demise Chua's analysis uncovers a fascinating historical pattern while policies of tolerance and assimilation toward conquered peoples are essential for an empire to succeed the multicultural society that results introduces new tensions and instabilities threatening to pull the empire apart from within What this

means for the United States uncertain future is the subject of Chua's provocative and surprising conclusion      *Readers' Guide to Periodical Literature* Anna Lorraine Guthrie, Bertha Tannehill, Neltje Marie Tannehill Shimer, 1919      **The New Map** Daniel Yergin, 2021-09-14 A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for The New Map by the American Energy Society A master class on how the world works NPR Pulitzer Prize winning author and global energy expert Daniel Yergin offers a revelatory new account of how energy revolutions climate battles and geopolitics are mapping our future The world is being shaken by the collision of energy climate change and the clashing power of nations in a time of global crisis Out of this tumult is emerging a new map of energy and geopolitics The shale revolution in oil and gas has transformed the American economy ending the era of shortage but introducing a turbulent new era Almost overnight the United States has become the world's number one energy powerhouse Yet concern about energy's role in climate change is challenging the global economy and way of life accelerating a second energy revolution in the search for a low carbon future All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought World politics is being upended as a new cold war develops between the United States and China and the rivalry grows more dangerous with Russia which is pivoting east toward Beijing Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership as China projects its power and influence in all directions The South China Sea claimed by China and the world's most critical trade route could become the arena where the United States and China directly collide The map of the Middle East which was laid down after World War I is being challenged by jihadists revolutionary Iran ethnic and religious clashes and restive populations But the region has also been shocked by the two recent oil price collapses and by the very question of oil's future in the rest of this century A master storyteller and global energy expert Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead      *The ... avarice and competitiveness that motivated the European adventurers to seek a route to Asia centuries earlier Addressing the basic chronology and themes of the first century of the nation s expansion Schoonover locates the origins of the U S goal of globalization U S involvement in the War of 1898 reflects many of the fundamental patterns in our national history exploration and discovery labor exploitation violence racism class conflict and concern for security that many believe shaped America s course in the twentieth and twenty first century
