Doing Integrated History and Philosophy of Science: A Case Study of the Origin of Genetics Yafeng Shan, 2020-08-17 This book offers an integrated historical and philosophical examination of the origin of genetics. The author contends that an integrated HPS analysis helps us to have a better understanding of the history of genetics and sheds light on some general issues in the philosophy of science. This book consists of three parts. It begins with historical problems revisiting the significance of the work of Mendel, de Vries, and Weldon. Then it turns to integrated HPS problems developing an exemplar-based analysis of the development and the progress in early genetics. Finally, it discusses philosophical problems: conceptual change, evidence, and theory choice. Part I lays out a new historiography serving as a basis for the discussions in part II and part III. Part II introduces a new integrated HPS method to analyse and interpret the historiography in Part I and to re-examine the philosophical issues in Part III. Part III develops new philosophical accounts which will in turn make a better sense of the history of scientific practice more generally. This book provides a practical defence of integrated HPS: the best way to defend integrated HPS is to do it.

Cohen, 2012-12-06 For a North American seeking to know the Mexican mind and especially the sciences today and in their recent development a great light of genius is to be found in Mexico City in the late 17th century The genius is that of one who surely may be counted as the first Mexican philosopher of nature a nun of the Order of Saint Jerome Sor Juana Ines de la Cruz Sor Juana must speak for herself from her penetrating exercise of an independent mind within a political and religious formation which denigrated women and circumscribed reason itself To understand this world of ours to join in an enlightenment which would be both natural and inspired Sor Juana clearly understood the requirements of learning observing logic and reasoning In darkness foundering Words fail the troubled mind For who I ask can light me When Reason is blind Even now after the great steps toward liberation of women and the substantial scientific contributions toward sheer empirical awareness of both the multiple orders of Nature and the subtle aesthetics of individual art and social harmony we too in the earthly world of the 20th century must affirm what she affirmed
