**The Mind Parasites** Colin Wilson, 1969      **The Mind Parasites** Colin Wilson, 2013-05-15 Wilson has blended H P Lovecraft's dark vision with his own revolutionary philosophy and unique narrative powers to produce a stunning high tension story of vaulting imagination A professor makes a horrifying discovery while excavating a sinister archaeological site For over 200 years mind parasites have been lurking in the deepest layers of human consciousness feeding on human life force and steadily gaining a foothold on the planet Now they threaten humanity's extinction They can be fought with one weapon only the mind pushed to and beyond its limits Pushed so far that humans can read each other's thoughts that the moon can be shifted from its orbit by thought alone Pushed so that man can at last join battle with the loathsome parasites on equal terms      **Return of the Mind Parasites** Gary Lachman, Paul Levy, 2021      **Wetiko** Paul Levy, 2021-11-23 Explores how wetiko covertly operates both out in the world and within our minds and how it underlies every form of self destruction both individual and collective Reveals how wetiko's power lies in our blindness to it and examines how people across the ages have symbolized wetiko to help see it and heal it Examines the concept of wetiko as it appears in the teachings of the Kabbalah Hawaiian Kahuna shamanism mystical Christianity and the work of C G Jung In its Native American meaning wetiko is an evil cannibalistic spirit that can take over people's minds leading to selfishness insatiable greed and consumption as an end in itself destructively turning our intrinsic creative genius against our own humanity Revealing the presence of wetiko in our modern world behind every form of destruction our species is carrying out both individual and collective Paul Levy shows how this mind virus is so embedded in our psyches that it is almost undetectable and it is our blindness to it that gives wetiko its power Yet as Levy reveals in striking detail by recognizing this highly contagious mind parasite by seeing wetiko we can break free from its hold and realize the vast creative powers of the human mind Levy explores how artists philosophers and spiritual traditions across the ages have been creatively symbolizing this deadly pathogen of the psyche so as to help us see it and heal it He examines the concept of wetiko as it appears in the teachings of the Kabbalah Hawaiian kahuna shamanism Buddhism and mystical Christianity and through esoteric concepts like egregores demons counterfeiting spirits and psychic vampires He reveals how visionary thinkers such as C G Jung Sri Aurobindo Philip K Dick Colin Wilson Nicolas Berdyaev and Rene Girard each point to wetiko in their own unique and creative way He explores how the projection of the shadow self scapegoating is the underlying psychological mechanism fueling wetiko and examines wetiko in the context of the Covid 19 pandemic showing that we can reframe the pandemic so as to receive the lessons and opportunities embedded in it Revealing how the power of imagination can cure the wetiko mind virus Levy underscores how important it is for each of us to bring forth the creative spirit within us which helps shed the light of consciousness on wetiko taking away its power over us while simultaneously empowering ourselves      Colin Wilson, the Outsider and Beyond Clifford P. Bendau, 1979-01-01 Wilson who is acknowledged for the consistently high quality of his prose whether it be fiction nonfiction

or criticism has refused to accept the limitations of genre or form or to be placed in some literary cubbyhole Clifford P Bendau here covers Wilson s work from his first appearance as a literary enfant terrible to the publication of his landmark novel *The Space Vampyres* 1976 regarded by many critics as one of his finest works

**Healing the Wounded Mind** Kingsley L. Dennis,2019-10-10 There is a mental malaise creeping through the collective human mindset Mass psychosis is becoming normalized It is time to break free One of the key problems facing human beings today is that we do not look after our minds As a consequence we are unaware of the malicious impacts that infiltrate and influence us on a daily basis This lack of awareness leaves people open and vulnerable Many of us have actually become alienated from our own minds argues Kingsley L Dennis This is how manipulations occur that result in phenomena such as crowd behaviour and susceptibility to political propaganda consumerist advertising and social management Mass psychosis is only possible because humanity has become alienated from its transcendental source In this state we are prisoners to the impulses that steer our unconscious We may believe we have freedom but we don t *Healing the Wounded Mind* discusses these external influences in terms of a collective mental disease the wetiko virus Forbes ahrimanic forces Steiner the alien mind Castaneda and the collective unconscious shadow Jung The human mind has been targeted by corrupt forces that seek to exploit our thinking on a grand scale This is the magician s trick that has kept us captive within the social systems that both distract and subdue us In the first part of this transformative book the author outlines how the Wounded Mind manifests in cultural conditioning from childhood onwards In the second part he examines how hypermodern cultures are being formed by this mental psychosis and shaping our brave new world In an inspiring conclusion we are shown the gnostic path to freedom through connecting with the transcendental source of life

**The Philosophy of Horror** Noel Carroll,2003-09-02 Noel Carroll film scholar and philosopher offers the first serious look at the aesthetics of horror In this book he discusses the nature and narrative structures of the genre dealing with horror as a transmedia phenomenon A fan and serious student of the horror genre Carroll brings to bear his comprehensive knowledge of obscure and forgotten works as well as of the horror masterpieces Working from a philosophical perspective he tries to account for how people can find pleasure in having their wits scared out of them What after all are those paradoxes of the heart that make us want to be horrified

**Science Fiction and Psychology** Gavin Miller,2020-01-31 *Science Fiction and Psychology* explores science fiction literature s varied use of psychological discourses from the late nineteenth century to the end of the twentieth The readings explore the varied employment in science fiction of ideas from five key psychological schools evolutionary psychology psychoanalysis behaviourism existential humanism and cognitivism and conclude by examining psychology s use of science fiction

**Horror Literature through History** Matt Cardin,2017-09-21 This two volume set offers comprehensive coverage of horror literature that spans its deep history dominant themes significant works and major authors such as Stephen King Edgar Allan Poe and Anne Rice as well as lesser known horror writers Many of today s horror story fans who appreciate

horror through movies television video games graphic novels and other forms probably don't realize that horror literature is not only one of the most popular types of literature but one of the oldest. People have always been mesmerized by stories that speak to their deepest fears. Horror Literature through History shows 21st century horror fans the literary sources of their favorite entertainment and the rich intrinsic value of horror literature in its own right. Through profiles of major authors critical analyses of important works and overview essays focused on horror during particular periods as well as on related issues such as religion apocalypticism social criticism and gender readers will discover the fascinating early roots and evolution of horror writings as well as the reciprocal influence of horror literature and horror cinema. This unique two volume reference set provides wide coverage that is current and compelling to modern readers who are of course also eager consumers of entertainment. In the first section overview essays on horror during different historical periods situate works of horror literature within the social cultural historical and intellectual currents of their respective eras creating a seamless narrative of the genre's evolution from ancient times to the present. The second section demonstrates how otherwise unrelated works of horror have influenced each other how horror subgenres have evolved and how a broad range of topics within horror such as ghosts vampires religion and gender roles have been handled across time. The set also provides alphabetically arranged reference entries on authors works and specialized topics that enable readers to zero in on information and concepts presented in the other sections.

**Dark Thoughts** Steven Jay Schneider, Daniel Shaw, 2003. Is horror a fundamentally nihilistic genre? Why are those of us who enjoy horror films so attracted to watching things on screen that in real life we would almost certainly find repellent? Do monster movies have a deleterious moral effect on their viewers? In seeking to answer such questions as well as a host of related ones, *Dark Thoughts* reveals that our fascination with horror cinema and the pleasure we take in it is in the end simply a natural extension of a philosopher's inclination to wonder. This is a collection of highly engaging and provocative essays by top scholars in the increasingly interrelated fields of Philosophy Film Studies and Communication Arts that deal with the epistemology aesthetics ethics metaphysics and genre dynamics of horror cinema past and present. Contributors include Curtis Bowman Noël Carroll Elizabeth Cowie Angela Curran Cynthia Freeland Michael Grant Matt Hills Deborah Knight George McKnight Ken Mogg Aaron Smuts Robert C. Solomon and J. P. Telotte. Over the past several years one of the hottest topics in the realm of philosophical aesthetics has been cinematic horror. The emotional effects it has on audiences the mysterious metaphysics of its impossible beings the controversial ethics of its violent contents these are just a few of the concerns to have drawn the attention of scholars and students alike. Not to mention the genre's legions of fans. Since the publication of Noël Carroll's groundbreaking study *The Philosophy of Horror or Paradoxes of the Heart* 1990 and including most recently Cynthia Freeland's *The Naked and the Undead: Evil and the Appeal of Horror* 2000 a plethora of articles have been authored by seemingly normal philosophers about the decidedly abnormal activities of the antagonists of fright flicks.

*Star of the Sea* Una McCormack, 2016-10-25. My name is Cassandra. My mother

was the Walker The peace and stability of Stella Maris have been lost perhaps forever Weeks after Delia Walker found the remote world trailing murderers and soldiers in her wake more ships are coming And now the impossible a young woman claiming to be Walker s daughter has come out of the Weird portal demanding passage off the planet For Cassandra her mother s former young charge Falt and the cynical worldly wise Yale a desperate race begins to reach the very heart of the Expansion and avert a disaster On Stella Maris the star of the sea a fight has begun to preserve the refuge and its fragile harmony from those who would exploit it      *Decoding the Mind of God* Margret Ann Kelly,2011-07-06 In *Decoding the Mind of God* author O M Kelly delves into the unconscious mind and discovers the secrets of the collective consciousness showing how we can realize the potential of the human mind through belief in ourselves The Laws of the universe are identical to the collective consciousness they reveal an answer to every question we are capable of asking We constantly receive these answers through the vibrations of the energy fields through our being all without us knowing how to realign our intelligence with our unconscious mind The truth remains hidden to us Surprising as it may seem the key to understanding ourselves lies in a mathematical language which is the make up of the unconscious mind Kelly explores this language through the texts and myths of myriad cultures and belief systems notwithstanding the truth of the science behind the Egyptian Hieroglyphs and the stories collected in the Bible As we read this volume we realize that all of these stories are connected to our own story within Kellys perceptions of the order of higher consciousness are framed by stories from her experiences of personal discovery and over twenty years of researching lecturing and teaching all around the world Once these codes are unveiled we earn our freedom where we can release the fear in which humanity habitually traps itself creating our accidents diseases why we die right up to explaining extra terrestrial intelligence This book exposes the secret codes of the universal language that will help us achieve the divine unity with the universe and ourselves      *What the Fact?* Seema Yasmin,2023-10-10 Tracing the spread of misinformation and disinformation through our fast moving media landscape a journalist scientist medical professional and professor gives readers the skills to identify and counter poorly sourced clickbait and misleading headlines      [Challenges to the Enlightenment](#) Academy of Humanism,Academy of Humanism Staff,2010-10-05 The Enlightenment was an intellectual movement which began in seventeenth century Europe and espoused an optimistic project an end to human ignorance and the slavish adherence to ancient texts and dogma the application of scientific principles to solving the world s problems the elimination of inequality between the sexes and the advocacy of political rights for all citizens Modern western society with its democratic institutions and its reliance on science as the basis of technology and industry is largely an outgrowth of Enlightenment ideals Yet today the entire Enlightenment agenda is being challenged not only by members of the religious orthodoxy but also by a group of academics loosely described under the label of postmodernism Whereas the Enlightenment project has always been at odds with religious orthodoxy which has traditionally been suspicious of efforts to achieve human progress without supernatural support today it must deal with a very different

type of attack from postmodernist intellectuals Critics of this school question the very ability of human reason to grasp objective reality and they raise serious objections to the reliability and efficiency of the scientific method and the tyranny of democratic elites Is the Enlightenment project still worth pursuing The distinguished members of the Academy of Humanism who have contributed to this important collection of essays are united in their conviction that the ideals of the Enlightenment must be preserved Editors Paul Kurtz and Timothy J Madigan have grouped the diverse perspectives represented in this volume into three major sections dealing with philosophical issues scientific issues and social issues These cogently argued and vigorous responses to traditional and postmodernist criticisms of the Enlightenment make it clear that reason science and the political and social ideals of the Enlightenment are indispensable for the welfare and future of our planet The Blood is the Life Leonard G. Heldreth, Mary Pharr, 1999 The essays in this volume use a humanistic viewpoint to explore the evolution and significance of the vampire in literature from the Romantic era to the millennium BOOK JACKET Around the Outsider Colin Stanley, 2011-05-16 In May 1956 aged just 24 Colin Wilson achieved success and overnight fame with his philosophical study of alienation and transcendence in modern literature and thought The Outsider Fifty four years on and never out of print in English the book is still widely read and discussed having been translated into over thirty languages In a remarkably prolific career Wilson a true polymath has since written over 170 titles novels plays and non fiction on a variety of subjects This volume brings together twenty essays by scholars of Colin Wilson's work worldwide and is published in his honour to mark the author's 80th birthday Each contributor has provided an essay on their favourite Wilson book or the one they consider to be the most significant The result is a varied and stimulating assessment of Wilson's writings on philosophy psychology literature criminology and the occult with critical appraisals of four of his most thought provoking novels Altogether a fitting tribute to a writer **Cognition, Mindreading, and Shakespeare's Characters** Nicholas R.
