## **The New Evangelism And Other Papers:**

**The New Evangelism** Henry Drummond, 2014-05-12 Professor Drummond's influence on his contemporaries is not to be measured by the sale of his books great as that has been. It may be doubted whether any living novelist has had so many readers and perhaps no living writer has been so eagerly followed and so keenly discussed on the Continent and in America. The New Evangelism contains his most important writings: The New Evangelism and its Relation to Cardinal Doctrines, The Method of the New Theology and some of its Applications, Survival of the Fittest, The Third Kingdom, The Problem of Foreign Missions, The Contribution of Science to Christianity, Spiritual Diagnosis. The New Evangelism, and Other Addresses

Henry Drummond, 2013-02-19 The question you will naturally ask at the outset is: What is the new Evangelism? Now that is a question that I cannot answer. I do not know what the new Evangelism is and it is because I do not know that I write this paper. I write because I ought to know and am trying to know. Many here and all the most earnest minds of our Church are anxiously asking this question and each who has once asked it feels it to be one of the chief objects of his life to answer it. Included here are: The New Evangelism and its Relation to Cardinal Doctrines, The Method of the New Theology and some of its Applications, Survival of the Fittest, The Third Kingdom, The Problem of Foreign Missions, The Contribution of Science to Christianity and Spiritual Diagnosis. **The New Evangelism and Other Papers**

The Spiritual Vision of Frank Buchman

Philip Boobyer, 2015-06-29 The Spiritual Vision of Frank Buchman is an in-depth look at the life, spirituality and ideology of one of the most original figures in twentieth-century religion. Frank Buchman (1878-1961), the Pennsylvania-born initiator of the movement known as the Oxford Group and Moral Re-Armament, was a Lutheran pastor who first had influence as a college evangelist and missionary with the YMCA. His thinking then evolved during the 1930s, the Second World War and the early Cold War as he tried to develop a world philosophy that could offer an answer to war and materialism. His impact was particularly felt in the areas of conflict.

resolution between nations and interfaith dialogue and Alcoholics Anonymous also owed much to his methods Philip Boobbyer's book is the first scholarly overview of Buchman's ideas and is an important addition to the growing corpus of academic literature on his worldwide outreach Boobbyer shows how his work reflected broader processes in twentieth century religion and politics and can be seen as a spiritual response to an emerging global society *The Books Early AAs Read for Spiritual Growth* Dick B.,1998 The most exhaustive bibliography with brief summaries of all the books known to have been read and recommended for spiritual growth by early AAs in Akron and on the East Coast *Communicating Physics* Josep Simon,2015-07-22 The textbooks written by Adolphe Ganot 1804-87 played a major role in shaping the way physics was taught in the nineteenth century Ganot's books were translated from their original French into more than ten languages including English allowing their adoption as standard works in Britain and spreading their influence as far as North America Australia India and Japan Simon's Franco-British case study looks at the role of Ganot's two textbooks *Traité élémentaire de physique expérimentale et appliquée* 1851 and *Cours de physique purement expérimentale* 1859 and their translations into English by Edmund Atkinson The study is novel for its international comparison of nineteenth century physics its acknowledgement of the role of book production on the impact of the titles and for its emphasis on the role of communication in the making of science *The Bookseller* ,1900 **One Law** Henry Drummond,Ruth L. Miller,2013-06-11 This latest addition to the Library of Hidden Knowledge series provides a modern understanding of Henry Drummond's powerful philosophical writings about the harmony between science and spirituality Is there not reason to believe that many of the Laws of the Spiritual World hitherto regarded as occupying an entirely separate province are simply the Laws of the Natural World Henry Drummond Using spiritual experience to explain scientific principles New Thought pioneer Henry Drummond's provocative essays demonstrate the direct connection between spiritual law and natural law to introduce a worldview unbound by conventional thought Today his groundbreaking observations are as relevant as ever and in *One Law* Dr Ruth Miller incorporates the modern laws of physics biology cybernetics and ecology with Drummond's original essays to decode the spiritual realm Bridge the gap between science and spirituality and forever change the way you see the world by rediscovering Drummond's provocative theory that natural law and spiritual law are one and the same *Anglia* ,1904

The vast majority of European countries have never had a Newton Pasteur or Einstein Therefore a historical analysis of their scientific culture must be more than the search for great luminaries Studies of the ways science and technology were communicated to the public in countries of the European periphery can provide a valuable insight into the mechanisms of the appropriation of scientific ideas and technological practices across the continent The contributors to this volume each take as their focus the popularization of science in countries on the margins of Europe who in the nineteenth and twentieth centuries may be perceived to have had a weak scientific culture A variety of scientific genres and forums for presenting science in the public sphere are analysed including botany and women teaching and popularizing physics and thermodynamics scientific theatres national and international exhibitions botanical and zoological gardens popular encyclopaedias popular medicine and astronomy and genetics in the press Each topic is situated firmly in its historical and geographical context with local studies of developments in Spain Portugal Italy Hungary Denmark Belgium and Sweden Popularizing Science and Technology in the European Periphery provides us with a fascinating insight into the history of science in the public sphere and will contribute to a better understanding of the circulation of scientific knowledge
