Merleau-Ponty and the Face of the World Glen A. Mazis, 2016-09-21 Assesses Merleau Ponty's contribution to ethics as calling for a poetic interplay between perception and imagination and between silence and solidarity that reveals our place in the world and our obligations to ourselves and others. Before his death in 1961 Merleau Ponty worried about what he saw as humanity's increasingly self enclosed and manipulative way of experiencing self others and the world the consequences of which remain apparent in our destructive inability to connect with others within and across cultures. In Merleau Ponty and the Face of the World Glen A. Mazis provides an overall consideration of Merleau Ponty's philosophy that brings out what he sees as a corrective prescription for ethical reorientation that is fundamental to Merleau Ponty's thought. Mazis begins by analyzing the key role that silence plays for Merleau Ponty as a positive powerful presence rather than a lack or emptiness and then builds on this to explore the ethical significance of the face to face encounter in his thought as one of solidarity rather than obligation. In the last part of the book Mazis traces the development of what he calls physiognomic imagination in Merleau Ponty's work. This understanding of imagination is not fancy or make believe but rather brings out the depths of perceptual meaning and leads to an appreciation of poetic language as the key to revitalizing both ethics and ontology. Drawing on Merleau Ponty's published works lecture notes unpublished writings and the work of many phenomenologists and Merleau Ponty scholars Mazis also offers incisive readings of Merleau Ponty's work as it relates to that of Antoine de Saint Exupéry Gaston Bachelard and Emmanuel Levinas. The Teacher's handbook of psychology James Sully, 1914

Phantasy, Image Consciousness, and Memory (1898-1925) Edmund Husserl, 2005-07-27 This is the first English translation of Husserliana XXIII the volume in the critical edition of Edmund Husserl's works that gathers together a rich array of posthumous texts on representational consciousness The lectures and sketches comprising Husserliana XXIII come from a period of enormous productivity and pivotal development in Husserl's philosophical life extending from the years immediately preceding the Logical Investigations 1900-01 almost to the time of his retirement in 1928 They make available the most profound and comprehensive Husserlian account of image consciousness the awareness we have when we look at a picture or see a play and of its relation to art and the aesthetic They explore phantasy in depth and furnish nuanced accounts of perception and memory They enrich the Husserlian analysis of time consciousness and offer a fascinating picture of the sometimes tortuous paths Husserl took in his efforts to comprehend how the forms of representation are constituted and how they are related to one another and to perception Phantasy Image Consciousness and Memory should prove to be an indispensable resource for Husserlian phenomenologists and for anyone else interested in thinking about these fundamental phenomena

Neighbourhood Perceptions of the Ukraine Crisis Gerhard

Besier, Katarzyna Stoklosa, 2016-11-03 Recent events in Ukraine and Russia and the subsequent incorporation of Crimea into the Russian state with the support of some circles of inhabitants of the peninsula have shown that the desire of people to belong to the Western part of Europe should not automatically be assumed. Discussing different perceptions of the Ukrainian-Russian war in neighbouring countries, this book offers an analysis of the conflicts and issues connected with the shifting of the border regions of Russia and Ukraine to show how material and psychological borders are never completely stable ideas. The contributors, historians, sociologists, anthropologists and political scientists from across Europe, use an interdisciplinary and comparative approach to explore the different national and transnational perceptions of a possible future role for Russia.

The Body in Tolkien's Legendarium Christopher Vaccaro, 2013-08-29 The timely collection of essays is thematically unified around the subject of corporeality. Its theoretical underpinnings emerge out of feminist, Foucauldian, patristic and queer hermeneutics. The book is organized into categories specific to transformation: spirit versus body discourse and source material. More than one essay focuses on female bodies and on the monstrous or evil body. While Tolkien's *The Lord of the Rings* is central to most analyses, authors also cover *The Hobbit*, *The Silmarillion* and material in *The History of Middle-earth*.

Global Negotiation William Hernández Requejo, John L. Graham, 2014-12-02 Each year American executives make nearly eight million trips overseas for international business. In the process, they leave billions of dollars on the negotiation table. *Global Negotiation* provides critical tools to help businesspeople save money and face when negotiating across cultural divides. Drawing on their more than 50 combined years of experience as well as extensive field research with over 2000 business people in 21 different cultures, John L. Graham and William Hernández Requejo have discovered how to create long-lasting commercial relationships around the world. The authors provide a rare combination of practical insight and illuminating anecdotes and offer examples from well-known companies such as Toyota, Ford, Intel, AT&T, Rockwell, Boeing and Wal-Mart. *Global Environmental Negotiations and US Interests* D. Davenport, 2006-10-16 This book examines the question of why effective action has been taken to ameliorate some global environmental problems while no improvement has been made on others. This book provides a comprehensive typology of the potential costs and benefits of effective agreements and clarifies the leader's true interests on particular environmental issues. **Catastrophes and Conflicts** Klaus

Gottstein, 2018-12-17 First published in 1999, this book describes what the international community of scientific institutions could do to reverse this trend by pooling its know-how and resources in international and interdisciplinary working groups and standing committees by preparing options for action and by standing the possibilities for overcoming the political and economic obstacles to the implementation of expert advice. The reasons are given why neighboring groups of people sooner or later start fighting each other unless certain conditions are fulfilled. These conditions are enumerated. Historical examples are presented. Since lack of mutual trust, often based on inherited enemy images, is at the roots of many conflicts, it is shown how trust among former opponents can be created by working on joint projects, particularly when both sides are threatened.

by the same danger In previous history this danger was often a common enemy Today we must learn that all of mankind is threatened by environmental and other global problems which can only be mastered by joint efforts forgetting the enmities of earlier generations Furthermore it is explained that many catastrophes could be avoided if risks were properly assessed and taken seriously and necessary precautions not avoided for financial reasons just hoping for the best

The Meaning of the Nuclear Revolution Robert Jervis, 1989 A comprehensive analysis that thrusts Jervis into the front ranks of nuclear essayists Kirkus Reviews Robert Jervis argues here that the possibility of nuclear war has created a revolution in military strategy and international relations He examines how the potential for nuclear Armageddon has changed the meaning of war the psychology of statesmanship and the formulation of military policy by the superpowers *Transatlantic Images and Perceptions* David E. Barclay, Elisabeth Glaser-Schmidt, 2003-02-13 Over the last two centuries Germans and Americans have been rivals friends opponents and most recently allies This 1997 cross disciplinary collection of essays analyses how German and American views of each other developed and periodically shifted providing a fresh analysis of the often complex German American relationship The images that resulted from encounters between the two countries frequently reflected significant cross currents of the contemporary relations and often foreshadowed important trends The nine German and eight American contributors to this volume analysed travelogues private letters diaries diplomatic reports and newspaper articles from the wake of US independence through the reunification of Germany and also post 1945 movies that reflect these cross cultural encounters and illustrate how political agendas prejudices stereotypes and pragmatic forces influenced individual group and mass perceptions of the other society *The Handbook of Negotiation and Culture* Michele J. Gelfand, Jeanne M. Brett, 2004 In the global marketplace negotiation frequently takes place across cultural boundaries yet negotiation theory has traditionally been grounded in Western culture This book which provides an in depth review of the field of negotiation theory expands current thinking to include cross cultural perspectives The contents of the book reflect the diversity of negotiation research negotiator cognition motivation emotion communication power and disputing intergroup relationships third parties justice technology and social dilemmas and provides new insight into negotiation theory questioning assumptions expanding constructs and identifying limits not apparent from working exclusively within one culture The book is organized in three sections and pairs chapters on negotiation theory with chapters on culture The first part emphasizes psychological processes cognition motivation and emotion Part II examines the negotiation process The third part emphasizes the social context of negotiation A final chapter synthesizes the main themes of the book to illustrate how scholars and practitioners can capitalize on the synergy between culture and negotiation research

Constructive Interventions Lars Kirchhoff, 2008-01-01 In the contemporary discipline of conflict resolution adjudication and alternative dispute resolution ADR are often seen as antagonistic trends This important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice With great insight and passion built firmly on a vast

knowledge of the field Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play The work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way In the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the method s critical challenges and clarifies the particular model of international mediation under development through UN initiatives In approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the United Nations He explores such diverse scenarios as conflicts between States conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice Although some of the reasons for this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature It is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace

Perception-Cognition Interface & Cross-Modal Experiences: Insights into Unified Consciousness Aleksandra Mroczo-Wąsowicz, 2017-01-26 The present Research Topic explores closely related aspects of mental functioning namely an interplay between perception and cognition interactions among various sensory modalities and finally more or less unified conscious experiences arising in the context of these relations Contributions emphasize a high flexibility observed in perception and may be seen as potential challenges to the traditional modular architecture of perceptual systems Although the articles describe different phenomena they follow one common theme to investigate broadly understood unified experience by studying either perception cognition integration or the integration between sensory modalities These integrative processes may well apply to subpersonal unconscious representations However the aim here is to approach phenomenal experience and thus a straightforward way of thinking about it is in terms of conscious perception Putting together scientific and philosophical concerns this special issue encourages extending the study

of perceptual experience beyond the single sense perception to advance our understanding of the complex interdependencies between different sensory modalities other mental domains and various kinds of unifying relations within conscious experience It exhibits a remarkable need to study these phenomena in tangent and so the authors examine a variety of ways in which our perceptual experiences may be cross modal or multisensory integrated embodied synesthetic cognitively penetrated or otherwise affected by top down influences The Research Topic comprises theoretical and empirical contributions of such fields as philosophy of mind cognitive science psychology and neuroscience in the form of hypothesis and theory articles original research articles opinion papers reviews and commentaries
