Painted Fire Elliott Pendleton White, 1952 **Wittgenstein's Whewell's Court Lectures** Yorick Smythies, 2017-03-31 Wittgenstein's Whewell's Court Lectures contains previously unpublished notes from lectures given by Ludwig Wittgenstein between 1938 and 1941 The volume offers new insight into the development of Wittgenstein's thought and includes some of the finest examples of Wittgenstein's lectures in regard to both content and reliability Many notes in this text refer to lectures from which no other detailed notes survive offering new contexts to Wittgenstein's examples and metaphors and providing a more thorough and systematic treatment of many topics Each set of notes is accompanied by an editorial introduction a physical description and dating of the notes and a summary of their relation to Wittgenstein's Nachlass Offers new insight into the development of Wittgenstein's ideas in particular his ideas about certainty and concept formation The lectures include more than 70 illustrations of blackboard drawings which underline the importance of visual thought in Wittgenstein's approach to philosophy Challenges the dating of some already published lecture notes including the Lectures on Freedom of the Will and the Lectures on Religious Belief *The Last Fire Season* Manjula Martin, 2025-05-13 H Is for Hawk meets Joan Didion in the Pyrocene in this arresting combination of memoir natural history and literary inquiry that chronicles one woman's experience of life in Northern California during the worst fire season on record FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD NATIONAL BESTSELLER AN NPR BEST BOOK OF THE YEAR Told in luminous perceptive prose The Last Fire Season is a deeply incisive inquiry into what it really means now to live in relationship to the elements of the natural world When Manjula Martin moved from the city to the woods of Northern California she wanted to be closer to the wilderness that she had loved as a child She was also seeking refuge from a health crisis that left her with chronic pain and found a sense of healing through tending her garden beneath the redwoods of Sonoma County But the landscape that Martin treasured was an ecosystem already in crisis Wildfires fueled by climate change were growing bigger and more frequent each autumn her garden filled with smoke and ash and the local firehouse siren wailed deep into the night In 2020 when a dry lightning storm ignited hundreds of simultaneous wildfires across the West and kicked off the worst fire season on record Martin along with thousands of other Californians evacuated her home in the midst of a pandemic Both a love letter to the forests of the West and an interrogation of the colonialist practices that led to their current dilemma The

Last Fire Season follows her from the oak hills of Sonoma County to the redwood forests of coastal Santa Cruz to the pines and peaks of the Sierra Nevada as she seeks shelter bears witness to the devastation and tries to better understand fire's role in the ecology of the West As Martin seeks a way to navigate the daily experience of living in a damaged body on a damaged planet she comes to question her own assumptions about nature and the complicated connections between people and the land on which we live

Fire Stephen J. Pyne, 2013-06-01 For over 400 million years fire has been an integral force on our planet It can be as innocent as a bonfire or as destructive and lethal as a wildfire Human history is rife with fires that have leveled cities the Fire of Moscow in 1812 that destroyed seventy five percent of the city the Great Chicago Fire in 1871 that took down 17 000 buildings and the fire that obliterated San Francisco after the 1906 earthquake are just a few Fire is a force of nature that can consume everything in its wake and yet it also has tremendous powers of cleansing and renewal At the end of the day we can't live without it In *Fire* Stephen J Pyne offers a concise history of fire and its use by humanity explaining how fire has been at the core of hunting foraging farming herding urbanizing and managing nature reserves He depicts how it gave humans power in ancient times which resulted in humanity beginning to reshape the world for its own benefit He describes how fire was used by aboriginal societies and the ways agricultural societies added control over fuel but warns that our mastery of the science and art of fire has not given us complete control fire disasters throughout history have defined cultures and unexpected fires that begin as the result of other disasters have shocking effects Pyne traces fire's influence on landscapes art science and even climate exploring the power a simple spark has over our imaginations Lavishly illustrated with a host of rare and unexpected images *Fire* is a sizzling and accessible tale of our relationship with this primal natural force
