My name is Kate Broom and I work as a maid in a big hotel at the seaside.

I have to clean twenty-two rooms every day. My job is really tiring, but I like it when the hotel guests are pleased with my work.

I always start by making the bed and vacuuming the whole room. Then I dust the furniture and mop the floors. Next, I go to the bathroom where I change the towels and clean the mirror, the shower, the bath, the toilet and the washbasin. I also leave some small bottles of shower gel, shampoo and liquid soap for the hotel guests.

It presents in depth coverage of management aspects and security needs and a new chapter covering the basics of blueprint reading. The chapter on water and wastewater mathematics has tripled in size and now contains an additional 200 problems and 350 math system operational problems with solutions. The manual examines numerous real world operating scenarios such as the intake of raw sewage and the treatment of water via residual management and each scenario includes a comprehensive problem solving practice set. The text follows a non traditional paradigm based on real world experience and proven parameters.
