Specifications

The HP Viridia 26/24 Series and its family of Viridia products are powerful, flexible patient monitoring systems that provide a wide range of data acquisition and processing functions for all types of patients, in both critical care and routine care settings. Although the Viridia 26/24 Series is highly reliable and easy to use, its high degree of flexibility and functionality may seem daunting to users and technicians who do not work with it on a regular basis.

Concepts The HP Viridia 26/24 Series is a flexible, bedside monitor for critical and acute-care units, and for patient transport between units (Viridia Model 24CT). It contains a user interface similar to the *Standard Control Panel* of Viridia CMS/ACMS, and supports a subset of the functionality of the Viridia CMS/ACMS. The Viridia 26/24 Series utilizes an outer housing that resembles the OmniCare CTS, but it contains a simplified hardware architecture, resulting in fewer replaceable parts.

Clinical Uses The Viridia 26/24 Series is designed to monitor patients in most critical and acute patient care areas of the hospital as well as in transport situations (Viridia Model 24CT). As a bedside monitor, the Viridia 26/24 Series is most commonly seen mounted to a wall channel with a six- or eight-slot Plug-in Satellite Rack mounted below it. It can also be mounted on a table mount and a roll stand. As a transport monitor (Viridia Model 24CT) a six-slot rack can be docked directly to the mainframe. The Viridia 26/24 Series supports a network connection to the Viridia monitoring network (SDN). The Viridia Model 24 and 24C's source of power is a local AC power connection. The Viridia Model 24CT is powered by either internal rechargeable batteries or from an AC power connection.

Standard Package

The Viridia 26/24 Series bedside monitor standard package includes:

- Mainframe with 9.5" passive matrix monochrome flat panel display (Viridia Model 24); mainframe with 10.4" color flat panel display (Viridia Model 24C/ 24CT) capable of displaying four waveforms simultaneously.
- Eight-slot Plug-in Satellite Rack with front-end link cable
