Welcome Address For A Womans Conference:

The World's Congress of Representative Women May Wright Sewall, 1894 The Rise of Women's Transnational Activism Marie Sandell, 2015-01-26 What characterised women's international co-operation in the interwar period? How did female activists from different countries and continents relate to one another? Marie Sandell here explores the changing experiences of women involved in the major international women's organisations including the International Council of Women, International Alliance of Women, Women's International League for Peace and Freedom and the International Federation of University Women, as well as the changing compositions and aims of the organisations themselves. Moving beyond an Anglo-American focus, Sandell analyses what the term international sisterhood meant in this broader context, which for the first time included women from the beyond the Western world. Focusing on shifting identities, this book investigates how notions of sisterhood were played out and contested during the interwar period and will be invaluable reading for scholars of women's history and twentieth-century world history.

Report on the Women's Auxiliary Conference, 1916 *The Indian Social Reformer*, 1928 Maritime Women: Global Leadership Momoko Kitada, Erin Williams, Lisa Loloma Froholdt, 2015-02-05 This exciting new WMU book series volume features the first attempt to include detailed experiences of women in the maritime sector at a global level. It highlights the achievement of women in the maritime sector in particular women's leadership and service to the sustainable development of the maritime industry. The volume contains contemporary studies on maritime women and follows an interdisciplinary approach. It offers an overview of women's integration into the maritime sector since the late 1980s as well as benchmarking its impact on various levels such as policy, employment, education, leadership and sustainability. Even 20 years after the Beijing Declaration, gender-related challenges at work still remain in the maritime sector, for example lack of gender policy, difficulty in work-life balance, access to education and leadership opportunities. The book addresses a series of recommendations that may further help the integration of women into the maritime sector.

Women's Movement and Associations Malladi Subbamma, 1994 Study based on India from the period of British occupation to the present day The Indian Quarterly Register, 1927 Women's Contribution to Science and Technology through ICWES Conferences Monique Frize, Claire Deschênes, Ruby Heap, 2023-12-09 This book discusses the legacy of the conference series The International Conferences of Women Engineers and Scientists (ICWES) which spans the second half of the Twentieth Century and the beginning of the twenty-first. The book first discusses how at a time when there were few women engineers and scientists a group of women organized a conference in June 1964 in New York which attracted 486 women. They presented their scientific achievements and discussed how to attract more women in STEM. This effort was carried out by volunteers continuing the ICWES conferences over a period of 59 years. The authors discuss the organizers, the hosting societies, the scientific content, the changes in issues over time and how the continuity has endured. The authors also discuss the importance of global involvement shown through past conferences in

locations such as USA UK Italy Poland France India Ivory Coast Hungary Japan Canada and Korea The authors also outline how the efforts were aided by the development of a not for profit Canadian corporation the International Conference of Women in Sciences and engineering INWES which ensures the continuation of the conference series Claire Desch nes and Monique Frize ensured that the conference database was digitalized and is now available at the Canadian Archive of Women in STEM University of Ottawa Library with the hope that researchers will continue to explore this rich database As an important part of the Women in Science and Engineering book series the work hopes to inspire women and men girls and boys to study and work in STEM fields This book is important historically because it documents a unique adventure created by women in STEM through vision and leadership Their efforts established modes of networking and sharing their contributions in science technology and on gender issues

Review G.A. Natesan, 1928 *The Anticolonial Front* John Munro, 2017-09-21 This is a transnational history of the activist and intellectual network that connected the Black freedom struggle in the United States to liberation movements across the globe in the aftermath of World War II. John Munro charts the emergence of an anticolonial front within the postwar Black liberation movement comprising organisations such as the National Association for the Advancement of Colored People, the Council on African Affairs and the American Society for African Culture, and leading figures such as W. E. B. Du Bois, Claudia Jones, Alphaeus Hunton, George Padmore, Richard Wright, Esther Cooper Jackson, Jack O. Dell, and C. L. R. James. Drawing on a diverse array of personal papers, organisational records, novels, newspapers, and scholarly literatures, the book follows the fortunes of this political formation, recasting the Cold War in light of decolonisation and racial capitalism and the postwar history of the United States in light of global developments.
