Who Should Pay? Natasha Quadlin, Brian Powell, 2022-01-14 Americans now obtain college degrees at a higher rate than at any time in recent decades in the hopes of improving their career prospects At the same time the rising costs of an undergraduate education have increased dramatically forcing students and families to take out often unmanageable levels of student debt The cumulative amount of student debt reached nearly 1.5 trillion in 2017 and calls for student loan forgiveness have gained momentum Yet public policy to address college affordability has been mixed While some policymakers support more public funding to broaden educational access others oppose this expansion Noting that public opinion often shapes public policy sociologists Natasha Quadlin and Brian Powell examine public opinion on who should shoulder the increasing costs of higher education and why *Who Should Pay* draws on a decade's worth of public opinion surveys analyzing public attitudes about whether parents students or the government should be primarily responsible for funding higher education Quadlin and Powell find that between 2010 and 2019 public opinion has shifted dramatically in favor of more government funding In 2010 Americans overwhelmingly believed that parents and students were responsible for the costs of higher education Less than a decade later the percentage of Americans who believed that federal or state local government should be the primary financial contributor has more than doubled The authors contend that the rapidity of this change may be due to the effects of the 2008 financial crisis and the growing awareness of the social and economic costs of high levels of student debt Quadlin and Powell also find increased public endorsement of shared responsibility between individuals and the

government in paying for higher education The authors additionally examine attitudes on the accessibility of college for all whether higher education at public universities should be free and whether college is worth the costs Quadlin and Powell also explore why Americans hold these beliefs They identify individualistic and collectivist world views that shape public perspectives on the questions of funding accessibility and worthiness of college Those with more individualistic orientations believed parents and students should pay for college and that if students want to attend college then they should work hard and find ways to achieve their goals Those with collectivist orientations believed in a model of shared responsibility one in which the government takes a greater level of responsibility for funding education while acknowledging the social and economic barriers to obtaining a college degree for many students The authors find that these belief systems differ among socio demographic groups and that bias sometimes unconscious and sometimes deliberate regarding race and class affects responses from both individualistic and collectivist oriented participants Public opinion is typically very slow to change Yet Who Should Pay provides an illuminating account of just how quickly public opinion has shifted regarding the responsibility of paying for a college education and its implications for future generations of students The Future of Higher Education

The American college and university today must assess what difference scholarship makes to teaching and what teaching means to scholarship. Reaffirming Higher Education asks who teaches what to whom and why. The authors maintain that what matters in higher learning is learning while denying that scholarship detracts from teaching. Chapter 1 discusses who should teach in a university and touches upon such topics as tenure and teaching. Chapter 2 defines what universities should teach and the mutuality of scholarship research and teaching. Chapter 3 answers who should go to college and why. Chapter 4 assesses the future of higher education in the American university and what is at stake on campus. William Scott Green places into perspective the authors' observations and ideals about higher education and what it means to make one's major field of study the major into a primary path to a liberal education. In this intelligent and insightful volume, the authors outline reform and renewal for both the institutional and personal dimensions of higher learning that would encompass the ideal of the academic ethic. This book should be read by all those who strive to make universities more humane: educators, parents, and students alike.

Restoring the Promise Richard K. Vedder, 2019-05-01

Higher education in America is in crisis. Costs are too high, learning is too little, and the payoff to students and society is increasingly problematic. In *Restoring the Promise*, Richard Vedder shows how the precarious position of colleges and universities results from a mostly unsuccessful expansion of governmental involvement in the academy, especially at the federal level. The book examines today's most serious issues in higher education, including free speech and academic freedom, tuition and other costs, culture and curricula, governance, gender, race, and diversity, due process, admissions, student loans, and much more. It diagnoses problems and identifies solutions. For example, the total cost of college per student in the United States is now higher than in any other country. When combining the monetary costs of college with the opportunity costs of losing years of labor to the economy, the true cost of higher education to American society well exceeds one trillion dollars annually. Yet despite American higher education's immense price tag, students are learning less than ever before and continue to be underemployed. The book discusses the three I's of university reform: information, incentives, and innovation. Without information, it is impossible for taxpayers and governing authorities to ensure that public education spending truly furthers the broader interests of society rather than the narrow interests of faculty and administrators. Shaping incentives for management would help to reduce costs and improve quality. Business practices such as Responsibility Centered Management (RCM), for example, allow profit to motivate efficiency and encourage learning outcomes. And expanding the use of innovation in technology and open online courses, along with relinquishing old rules such as tenure and three-month summer vacations, offer new hope for institutions of higher education. The book discusses such additional reforms as the following: Ending or revising the federal student financial aid program; Giving departments or even professors a share of overall revenue based on student enrollments in their classes; Departments or professors would then be required to pay their share of travel, building, rental, maintenance, utilities, and other such costs from the revenues they receive; Providing earnings data on former students by college five, ten, or fifteen years after

matriculation Prospective students and parents as well as lawmakers and oversight officials would be assisted regarding school successes and failures Increasing faculty teaching loads Instituting three year degrees and year round instruction Ending discrimination against for profit schools Ending grade inflation Ending speech codes and other barriers to academic freedom Ending affirmative action and related diversity programs And more [Wired for Success](#) Susan C.

Intro to Failure William Pacwa, 2020-08-12

The American higher education system is broken Colleges and universities are shifting far from their roots as centers for academic scholarship into pools of adult infants who barely mature and are provoked by the slightest non conforming opinions Their inefficiency is setting students up to fail wasting students time and providing little in return These institutions are now the hub for propagating modern indentured servitude by bestowing the youth thousands of dollars in unscrupulous student loan debt Instead of an atmosphere of intellectual curiosity the campus culture is saturated with promiscuity binge drinking and partying Increasingly common college students experience depression anxiety and physical abasement as a result of this environment A majority of incoming freshmen are now going to college to prolong adolescence rather than to progress upright into adulthood American higher education is a crumbling spectacle where the level of education the value of the degree and the overall prestige are quickly deteriorating Arguably the university system is now doing more harm than good Those who enter the supposed golden gates of higher education are not getting the positive return on investment of past generations Why has the higher education system changed so little in such a time of major transformation in the access to information through the internet How can it cost so

much more and take just as long to complete a standard bachelor s degree What are the main failures plaguing colleges and universities And what is the future for coming generations for those aspiring to gain an education This book sets out to find answers to the aforementioned questions William Pacwa graduated from a four year university in only two years at the age of 19 during the spring of 2020 Throughout this time in university he witnessed structural flaws in the American higher education system The goal of his book is to clearly articulate those problems and give concise solutions to rectify the inadequacies for the betterment of future generations And for those who still want or are required to attend university he uncovers the factors that allow students to complete their degree with speed and efficiency saving incoming students time and money The Whitehall Evening Post Or London Intelligencer ,1755 Re-Envisioning Higher Education Jing Lin,Rebecca L. Oxford,Edward J. Brantmeier,2013-10-01 This book will expand the horizon of higher education helping students faculty and administrators to return to their roots and be in touch with their whole being This book stresses that learning is much more than just accumulating knowledge and skills Learning includes knowing ourselves mind body and spirit The learning of compassion care and service are as crucial or even more important in higher education in order for universities to address students individual needs and the society s needs Higher education must contribute to a better world The book acknowledges that knowing not only comes from outside but also comes from within Wisdom is what guides students to be whole true to themselves while learning There are many ancient and modern approaches to gaining wisdom and wellness This book talks about contemplative methods such as meditation qigong yoga arts and dance that help people gain wisdom and balance in their lives and enhance their ability to be reflective and transformative educators and learners The Christian Union ,1888 *What's College For?* Zachary Karabell,1998-09-10 A hard hitting examination of the currentcrisis in higher education and an urgent call for major reform
