entertainment While the client server model has been the most widely adopted paradigm for the WWW the desire to provide more value added services in the delivery layer has led to the concept of an active network where content driven intelligent computation will be performed to provide quality of service for content presentation and best fit client demand These value added services typically aim to enhance information security provide pervasive Internet access and improve application robustness system network performance knowledge extraction etc They are realized by incorporating sophisticated mechanisms at the delivery layer which is transparent to the content providers and Web surfers Consequently the notion of Content Computing has emerged Content computing is a new paradigm for coordinating distributed systems and intelligent networks based on a peer to peer model and with value added processing of the application specific contents at the delivery layer This paradigm is especially useful to pervasive lightweight client devices such as mobile and portable end user terminals with a wide variation of hardware software configurations This year the workshop was held in Zhenjiang Jiangsu China We received 194 high quality papers from 11 regions namely PR China Korea Singapore Japan United States Canada Australia Germany Taiwan Italy and Hong Kong Totally 62 papers were accepted and presented in the workshop Law and Practice of Crowdfunding and Peer-to-Peer Lending in Australia, China and Japan Pelma Rajapakse, Yinxu Huang, Hatsuru Morita, 2022-08-03 The revolution in financial technology FinTech has created many advancements in the lending and investment space across the world Law and Practice of Crowdfunding and Peer to Peer Lending in Australia China and Japan is a timely publication as FinTech grows up and moved into the mainstream of finance in the last decade Financial services is a highly regulated industry as it is the lifeblood of a modern economy Pelma Rajapakse Hatsuru Morita and Yinxu Huang have done very solid work blazing a new trail in what is a new industry and how to regulate it properly instead of stifling innovation They have carried out a deep exploration and a thorough compilation of research that will bring everyone up to date on what Australia China and Japan are planning and doing in the field of crowdfunding and peer to peer lending In addition to peer to peer lending the book focuses on laws and practices related to Central Bank digital currencies cryptocurrency Bitcoin and Initial Coin Offerings ICOs which is very meaningful and forward looking The authors presented their thoughts in such clarity that even those who lack familiarity with Asia Pacific will see how FinTech was growing in various ways driven by different factors For example peer to peer lending in Japan is mostly for small and medium enterprises It was popular in China but cracked down by the authorities for a few years It provides an alternative fundraising channel for the capital market in Australia We also see a set of regulatory approaches among jurisdictions Some countries draft new regulations while others amend existing laws The mechanism of the regulatory sandbox was introduced As we know one size does not fit all What kind of best practices or lessons learned can we apply to our own jurisdiction This book covers all available answers to date This volume speaks highly of the quality and foresight of Pelma Rajapakse and her co authors *Reports and Documents* United States.
