Zooland Irus Braverman, 2012-11-28 This book takes a unique stance on a controversial topic: zoos. Zoos have their ardent supporters and their vocal detractors. And while we all have opinions on what zoos do, few people consider how they do it. Irus Braverman draws on more than seventy interviews

conducted with zoo managers and administrators as well as animal activists to offer a glimpse into the otherwise unknown complexities of zooland Zooland begins and ends with the story of Timmy the oldest male gorilla in North America to illustrate the dramatic transformations of zoos since the 1970s Over these decades modern zoos have transformed themselves from places created largely for entertainment to globally connected institutions that emphasize care through conservation and education Zoos naturalize their spaces classify their animals and produce spectacular experiences for their human visitors Zoos name register track and allocate their animals in global databases Zoos both abide by and create laws and industry standards that govern their captive animals Finally zoos intensely govern the reproduction of captive animals carefully calculating the life and death of these animals deciding which of them will be sustained and which will expire Zooland takes readers behind the exhibits into the world of zoo animals and their caretakers And in so doing it turns its gaze back on us to make surprising interconnections between our understandings of the human and the nonhuman **The use of the microscope** J. Belling,1930 Books and Pamphlets, Including Serials and Contributions to Periodicals Library of Congress. Copyright Office,1978 *Wittgenstein on Other Minds* Constantine Sandis,2025-03-11 The book brings together Constantine Sandis s essays on Wittgenstein s approach to understanding others Sandis sketches a picture of how his anti scepticism with regard to the philosophical problem of other minds is not only compatible with but also supported by his scepticism concerning the real life difficulty of understanding others and being understood by them While each individual essay focuses on particular issues in Wittgenstein including philosophical anthropology interpersonal psychology and animal concepts they collectively paint a picture of what he takes the real problem of other minds to be how to overcome it and the limitations of our understanding Sandis not only offers a fresh exegesis of Wittgenstein s public and private writings on these matters but proceeds to show the relevance of Wittgenstein beyond the academy International Books in Print ,1997 **Films and Other Materials for Projection** Library of Congress,1978 **Subject Guide to Books in Print** ,1991 Library of Congress Catalog Library of Congress,1971
