**Solar Energy in Small-scale Milk Collection and Processing** Wojciech Tuszyński, Eliza A. A. Diakowska, N. S. Hall, 1983-01-01 *Impact of COVID-19 on Egypt's dairy and artichoke value-chains: Qualitative findings from rapid value chain assessments* Abdelaziz, Fatma, Abay, Kibrom A., El-Enbaby, Hoda, Breisinger, Clemens, Kurdi, Sikandra, 2021-05-05 The COVID 19 crisis is having strong impacts on the Egyptian economy but these impacts differ strongly across sectors 1 Based on scenarios run using a Social Accounting Matrix SAM multiplier model of Egypt's economy COVID 19 is estimated to have resulted in an 8.6 percent decline in Egypt's GDP during the 4th quarter of FY 2019/20 April to June The services sector was hit hardest falling by 10.9 percent followed by industry which contracted by 8.3 percent Agriculture was the most resilient sector although there are large differences in the relative impact of COVID across agricultural subsectors **Milk and Meat from the Camel** Omar Abdurahman, 2004 Camel husbandry is becoming increasingly important in the arid zones of Africa The camel has long been the mainstay of pastoral societies due to its drought tolerance reliable milk and meat supply and ability to feed on a wide variety of plants In the last few years however camels are also seen more and more in semi arid rangelands especially where overgrazing has depleted the grasses and increased the relative importance of shrubs In spite of this growing importance research on camel was limited until the early seventies to studies on topics such as anatomy physiology behaviour and to a lesser extent disease However since the early eighties the interest of the research on camels has been growing Most advances have been made in reproductive physiology veterinary and in the biochemistry of milk while practical oriented research on improving camel productivity by developing marketable products targeting small and middle enterprises regrettably received little attention This book attempts to fill this gap The authors have profound knowledge on use of the camel as milk and meat animal This knowledge is based on results of research work carried out in partnership with universities camel farmers and pastoralists in Eastern African countries The first part deals with chemical composition technological properties hygienic safety and quality control of camel milk This is followed by the presentation of processing methods for different dairy products which should allow smallholder producers to process milk on farm or in centralised small scale dairy unit In the second part special knowledge gained in slaughtering deboning and processing of camels on site over several years of long term stays on the Ol Maisor Farm in Kenya is presented During the development of camel meat products the authors set a great value on the keeping quality of the products as well as creating a wide range of product groups with low and high cost for the local market and a good shelf life The book presents background information and recipes on the manufacture of camel milk and meat products and it is intended as a practical guide to professionals government bodies and development agencies interested in building up small scale processing units for camel meat and milk products It is hoped that it may also serve as a reference for extension personnel working with camel herders food scientists and students The book is concerned entirely with the one humped camel *Camelus dromedarius* The term camel should

therefore be taken to refer to this species unless specifically stated otherwise

*Renewable energy for agrifood chains* Puri, M., Rincon, L., Maltsoglou, I., 2021-09-14 This report presents a structured approach to identify and estimate the market size of specific renewable energy technologies that have the potential to be deployed across specific stages of the agri food chains More specifically the methodology first analyses the countries value chains and aggregates them into similar agri food groups when possible Once the groupings are defined the value chains are mapped out and the energy requirements across the different stages of the value chain are defined Specific renewable energy options are then identified for each value chain based on the energy demand and the process for which energy is required This structure then feeds into the calculation of the overall market potential by chain and the renewable energy type identified For this report the methodology is illustrated with the case of solar energy technologies that have the potential to be deployed across the agriculture value chains in Rwanda
