Placing All Your Elements on the Table

Complete this worksheet after you have finished reading the section "Grouping the Elements."

You can tell a lot about the properties of an element just by looking at the element's location on the periodic table. This worksheet will help you better understand the connections between the periodic table and the properties of the elements. Follow the directions below, and use crayons or colored pencils to color the periodic table at the bottom of the page.

1. Color the square for hydrogen yellow.
2. Color the groups with very reactive metals red.
3. Color and label the noble gases orange.
4. Color the transition metals green.
5. Using black, mark the zigzag line that shows the position of the metalloids.
6. Color the metalloids purple.
7. Use blue to color all of the nonmetals that are not noble gases.
8. Color the metals in Groups 13–16 brown.
9. Circle and label the actinides in yellow.
10. Circle and label the lanthanides in red.
11. Circle and label the alkali metals in blue.
12. Circle and label the alkaline-earth metals in purple.
13. Circle and label the halogens in green.

A blank periodic table of elements. The table is organized into rows and columns. The first row contains elements 1 through 18. The second row contains elements 19 through 36. The third row contains elements 37 through 54. The fourth row contains elements 55 through 72. The fifth row contains elements 73 through 86. The sixth row contains elements 87 through 104. The seventh row contains elements 105 through 118. Below the seventh row, there are two additional empty rows for elements, each containing 18 empty boxes.
