

STEP 12

Use some tape to temporarily hold the keypad in position.

STEP 13

Take the inner lock handle and remove the cover. There is a screw on the underside.

IMPORTANT: this screw is in reverse, turn clockwise fully and then remove the cover

STEP 14

Place the lock body on the door, thread the cable through the battery holder. Check if the cable is long enough to plug in, if not then the extension cable is required.

STEP 15

Connect the extension cable and carefully tuck the connector back into the door saving.

STEP 16

Attach the rubber gasket to the internal lock body.

STEP 17

Place the lock body on the door, locating the spindle. If the spindle is too short, then use the next size up. Feed the cable through the battery pack. Select the correct length bolts and locate the threaded studs. Secure tightly.

STEP 18

Plug the cable in and insert 4 x AA batteries (not included)

STEP 19

Fit the cover, it hooks in at the top.

STEP 20

Remember that the screw tightens in reverse, so turn anticlockwise.

Remove the masking tape.

STEP 21

Test from the inside by lifting the handle, the hooks of rollers will engage. Now pull the handle down, the latch and hooks should retract fully. Lift the handle again to 'lock' the door. Some multi-points will activate the deadbolt. Just make sure that everything retracts.

STEP 22

By default, pulling down the outside handle will do nothing. Insert the emergency key and turn 90 degrees, pull the handle down and it should retract the hooks and latch. Turn the key back and remove. Be sure to keep the keys in a safe place.

Now refer to the enclosed User Manual for instructions on how to add the lock to the TLock smartphone app.
