Healing the Split John E. Nelson, 1994-03-15 The links between madness creative genius and spiritual experiences have tantalized philosophers and scientists for centuries In *Healing the Split* John Nelson brings the lofty ideas of transpersonal psychology down to earth so they can be applied in a practical way to explain the bizarre effects of insanity on the human mind Drawing on a vast knowledge of Eastern philosophy and mainstream neuropsychiatry he heals the split between orthodox and alternative views with a comprehensive approach that goes beyond both Starting where R D Laing and Thomas Szasz left off Nelson revises and expands their radical views in light of modern brain science He then turns to ancient tantric yoga for a synthesis that weaves brain psyche and spirit into a compelling new conception of mental

illness For professionals who seek to meet the needs of their patients more creatively this book offers a unique synthesis For people in emotional crisis it clarifies the distinctions among intractable psychosis temporary breakdowns in the service of healing spiritual emergencies and psychic breakthroughs spiritual emergence And for anyone interested in the seemingly inexplicable workings of the human mind gone mad this fascinating exploration of psychotic states of consciousness will be exciting reading

The Problem of Disenchantment Egil Asprem, 2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people's everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprem casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge *The Problem of Disenchantment* is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio

*The Sphinx and the Rainbow* David Loye, 1998-12 *The Sphinx and the Rainbow* explores how the frontal brain may interact with the right and left brain in forecasting the future how the new psychophysics may explain old questions about mind brain relationships and the mystifying phenomena of precognitions Loye's book comprises a historic synthesis of neuropsychology psychology parapsychology and physics His book is a pioneering attempt to put together a coherent picture of the predicting mind

**The Reenchantment of the World** Morris Berman, 1981 Morris Berman's book addresses what I consider to be the most important topic at our present moment in history He is searching for the underpinnings of a new world view that can give rise to a culture capable of relating gently and self-sustainingly to the earth Frederick Ferr *The Reenchantment of the World* is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it Berman shows how science acquired its controlling position in the consciousness of the West He analyzes the holistic animistic tradition destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries which viewed man as a participant in the cosmos not as an isolated observer Arguing that the holistic world view must be revived in some credible form before

we destroy our society and our environment he explores the possibilities for a consciousness appropriate to the modern era Ecological rather than animistic this new world view would be grounded in the real and intimate connection between man and nature Metaphors of Consciousness Ronald S. Valle,Rolf von Eckartsberg,2012-12-06 As we move into the 1980s there is an increasing awareness that our civilization is going through a profound cultural transformation At the heart of this transformation lies what is often called a paradigm shift a dramatic change in the thoughts perceptions and values which form a particular vision of reality The paradigm that is now shifting comprises a large number of ideas and values that have dominated our society for several hundred years values that have been associated with various streams of Western culture among them the Scientific Revolution of the seventeenth century The Enlightenment and the Industrial Revolution They include the belief in the scientific method as the only valid approach to knowledge the split between mind and matter the view of nature as a mechanical system the view of life in society as a competitive struggle for survival and the belief in unlimited material progress to be achieved through economic and technological growth All these ideas and values are now found to be severely limited and in need of radical revision **The Haunting of Twentieth-Century America** Joel Martin,William J. Birnes,2011-09-13 From the Nazis to the new millennium Jacket *Esalen* Jeffrey J. Kripal,2011-09-07 Jeffrey Kripal here recounts the spectacular history of Esalen the institute that has long been a world leader in alternative and experiential education and stands today at the center of the human potential movement Forged in the literary and mythical leanings of the Beat Generation inspired in the lecture halls of Stanford by radical scholars of comparative religion the institute was the remarkable brainchild of Michael Murphy and Richard Price Set against the heady backdrop of California during the revolutionary 1960s Esalen recounts in fascinating detail how these two maverick thinkers sought to fuse the spiritual revelations of the East with the scientific revolutions of the West or to combine the very best elements of Zen Buddhism Western psychology and Indian yoga into a decidedly utopian vision that rejected the dogmas of conventional religion In their religion of no religion the natural world was just as crucial as the spiritual one science and faith not only commingled but became staunch allies and the enlightenment of the body could lead to the full realization of our development as human beings An impressive new book Kripal has written the definitive intellectual history of the ideas behind the institute San Francisco Chronicle Kripal examines Esalen s extraordinary history and evocatively describes the breech birth of Murphy and Price s brainchild His real achievement though is effortlessly synthesizing a dizzying array of dissonant phenomena Cold War espionage ecstatic religiosity incongruous pairings Darwinism Tantric sex and otherwise schizy ephemera psychedelic drugs spaceflight into a cogent satisfyingly complete narrative Atlantic Monthly Kripal has produced the first all encompassing history of Esalen its intellectual social personal literary and spiritual passages Kripal brings us up to date and takes us deep beneath historical surfaces in this definitive elegantly written book Playboy *The Quantum Moment* Robert P. Crease,Alfred Scharff Goldhaber,2014-09-29 A very fun way to learn about where quantum

physics comes from and the strange even astonishing places it has gone Peter Galison Harvard University author of Einstein's Clocks Poincaré's Maps From multiverses and quantum leaps to Schrödinger's cat and time travel quantum mechanics has irreversibly shaped the popular imagination Entertainers and writers from Lady Gaga to David Foster Wallace take advantage of its associations and nuances In The Quantum Moment philosopher Robert P Crease and physicist Alfred Scharff Goldhaber recount the fascinating story of how the quantum jumped from physics into popular culture with brief explorations of the underlying math and physics concepts and descriptions of the fiery disputes among figures including Einstein Schrödinger and Niels Bohr Understanding and appreciating quantum imagery its uses and abuses is part of what it means to be an educated person in the twenty first century The Quantum Moment serves as an indispensable guide

**Beyond Heaven and Earth** Steven H Propp, 2003-11-17 Have you ever wondered what happens to us when we die What if you really HAD to know When tragedy strikes the family of young Jobran Winter he is forced to confront these questions directly Undertaking a feverish Quest he explores various branches of Christianity Judaism Islam Hinduism

Buddhism Sikhism as well as the religions of China and Japan His search encompasses the New Age Reincarnation Spiritism and Psychical Research Attending channeling sessions and sances investigating haunted houses and Near Death Experiences he examines spiritual traditions ranging from Swedenborg to Scientology from Jodo Shinshu to the Jehovah s Witnesses Finally the Quest brings him into direct contact with Hospice work physical disability child abandonment abortion suicide euthanasia and even cold blooded murder Encounter the doctrines of Purgatory Predestination Universalism Annihilationism as you journey in a novel that will make you reexamine your ideas about religion skepticism love death and LIFE *Space, Time, and Medicine* Larry Dossey,1982-04-12 What we call modern physics says something entirely new about the world and how it behaves For many years these theories have been accepted as the most accurate descriptions we have ever had about our world Nevertheless medicine has been reluctant to incorporate these ideas into itself continuing to view the body as a clockwork mechanism in which illness is caused by a breakdown of parts Drawing on his long experience in the practice of internal medicine and his knowledge of modern science Dr Dossey shows how medicine can and must be updated Discussing the new theories of Bell Godel and others he opens up startling questions for medicine Could the brain be a hologram in which every part contains the whole Why have ordinary people been able to raise and lower blood pressure at will control heart rate body temperature even one minute blood vessel in a way no one can explain What is the role of consciousness in health and illness Perhaps the most startling of Dr Dossey s discussions concerns nonlinear time There is evidence that our obsession with time and our belief that time flows a belief refuted by the new physics may profoundly affect our health Time sickness is becoming an accepted medical concept a possible cause of the greatest killer of all heart disease Dr Dossey presents remarkable clinical data showing that by changing their view of time people have been able to positively affect the course of disease Just as the clockwork picture of the universe was abandoned in the onslaught of new data our mechanistic view of health and illness will give way to new models which too will be more consistent with the true face of the universe

Interacting with many scientific fields of study including psychology sociology evolutionary science cosmology and more Yong's Spirit of Creation demonstrates the significance of pentecostal ideas to the ongoing dialogue between theology and science
