**Disease Emergence and Resurgence** Milton Friend, 2006. **Development document for the proposed effluent limitations guidelines and standards for the meat and poultry products industry point source category (40 CFR 432)**, **Biosecurity and Bioterrorism**

Jeffrey Ryan, Jan Glarum, 2011-08-30. *Biosecurity and Bioterrorism* is the first book to take a holistic approach to biosecurity with coverage of pathogens, prevention, and response methodology. The book is organized into four thematic sections. Part I provides a conceptual understanding of biowarfare, bioterrorism, and the laws we have to counteract this. Part II investigates known bioagents and the threat from emerging diseases. Part III focuses on agricultural terrorism and food security. Part IV outlines international, US, and local initiatives for biodefense and biosecurity. Case studies illustrate biodefense against both

intentional terrorism and natural outbreaks The authors bring an extraordinary combination of experience in academia and the clinical world as well as real world experience in technical and practical matters to their writing They make technical material clear and fascinating for readers with a basic knowledge of biology Ryan and Glarum address the hazards in the context of vulnerability assessments and the planning strategies government and industry can take to prepare for and respond to such events How are these agents used in biowarfare How likely are we to face either a natural outbreak or intentional human animal infection How can we prepare for this effectively *Creatures of Empire* Virginia DeJohn Anderson, 2006 Book Review

*Noninvasive Survey Methods for Carnivores* Robert A. Long, Paula MacKay, Justina Ray, William Zielinski, 2012-09-26 The status of many carnivore populations is of growing concern to scientists and conservationists making the need for data pertaining to carnivore distribution abundance and habitat use ever more pressing Recent developments in noninvasive research techniques those that minimize disturbance to the animal being studied have resulted in a greatly expanded toolbox for the wildlife practitioner Presented in a straightforward and readable style *Noninvasive Survey Methods for Carnivores* is a comprehensive guide for wildlife researchers who seek to conduct carnivore surveys using the most up to date scientific approaches Twenty five experts from throughout North America discuss strategies for implementing surveys across a broad range of habitats providing input on survey design sample collection DNA and endocrine analyses and data analysis Photographs from the field line drawings and detailed case studies further illustrate on the ground application of the survey methods discussed Coupled with cutting edge laboratory and statistical techniques which are also described in the book noninvasive survey methods are efficient and effective tools for sampling carnivore populations *Noninvasive Survey Methods for Carnivores* allows practitioners to carefully evaluate a diversity of detection methods and to develop protocols specific to their survey objectives study area and species of interest It is an essential resource for anyone interested in the study of carnivores from scientists engaged in primary research to agencies or organizations requiring carnivore detection data to develop management or conservation plans

**The Baboon in Biomedical Research** John L. VandeBerg, Sarah Williams-Blangero, Suzette D. Tardif, 2009-06-04 Nonhuman primates have played critical roles in biomedical research and they are among the few animals whose use in research continues to increase The scientific value of nonhuman primates derives from their close phylogenetic proximity to man and their consequent anatomic physiologic and genetic similarities to man Only nonhuman primates can provide adequate models for many complex physiological and disease processes of humans The baboon is a relative newcomer to the repertoire of nonhuman primates used in biomedical research However in less than 50 years since its first use in the U S it has become one of the most popular laboratory primate species It is larger than the other widely used monkey species making it advantageous for many types of experiments and technological developments It is extraordinarily hardy and highly fecund in captivity It closely resembles humans in a variety of physiological and disease processes such as cholesterol metabolism early stages of

atherosclerosis and alcoholic liver disease Its chromosomes closely resemble those of humans and many genes of the two species lie in the same chromosomal order Among all primates baboons are the most widely used models for the genetics of susceptibility to complex diseases and they are the rst nonhuman primate for which a framework genetic linkage map was established In addition the baboon genome is currently being sequenced and as a result the utility of this species for biomedical research will be dramatically increased
