Method in Madness Jutta Fortin, 2005-01-01 Method in Madness looks at the ways in which nineteenth century French literature of the fantastic reflected what psychoanalysis would later define as mechanisms of defence Each chapter of the book is dedicated to a particular mechanism fetishization projection intellectualization mechanization and compulsion and to a representative set of texts which illustrate and embody the process concerned The book thus systematizes what has remained up to now a rather vague perception of the psychological processes at work in fantastic narrative and of the relationship between the fantastic and the emerging science of psychoanalysis Although centred on French works including texts by Gautier M rim e Balzac George Sand Maupassant and Villiers de l Isle Adam the study necessarily deals with the German tradition of the fantastic notably Hoffmann and Freud It argues that mechanisms of defence not only take place in fantastic literature but that the fantastic itself in fact consists in translating defence into the real thus making clear to the reader the very processes by which defence occurs The book finds that the defence mechanisms fail in the fantastic because in this literature defence involves adding a real danger to a merely psychic one thereby intensifying the anxiety and displeasure which the mechanisms of defence are ideally designed to minimize
