Mediating Nature Nils Lindahl Elliot, 2013-04-15 Mediating Nature provides a history of the present nature of mass mediation It examines the ways in which a number of discourses technologies and institutions have historically shaped the current ways of imagining nature in the mass media Where much of the existing research treats mass mediation as a matter of media technologies texts or institutions this text adopts a somewhat different approach it considers mass mediation as a historical process by means of which the members of audiences and indeed the public more generally came to be incorporated as observers in and of mass culture This approach allows the book to investigate the roles that a wide range of genres relating to nature played in constructing senses of nature but also of mass culture itself The genres include landscape paintings and gardens modern zoos photography early cinema nature essays disaster and animal attack films as well as wildlife documentaries on television The investigation develops what Lindahl Elliot describes as a social semeiotic approach that combines the semeiotic theory of Charles Peirce with a historical sociology of cultural formations Topical and timely this fascinating book will be of great interest to students and researchers in the fields of media sociology cultural geography and environmental studies

The Nature of the State Mark Whitehead, Rhys Jones, Martin Jones, 2007-01-11 The complex relationships between the state and nature remain under theorized and relatively unexplored Combining original research and theoretical insights The Nature of the State challenges the ways in which social scientists approach questions of socio environmental power and offers new insights into the history of state nature relations

Morris, 2002-07-29 This important book is the first serious philosophical examination of the modern state It inquires into the justification of this particular form of political society It asks whether all states are nation states what are the alternative ways of organizing

The Nature of the Operations of Modern Armies V.K. Triandafilov,2013-04-03 V K Triandafilov was an outstanding young commander who shaped the military theory and doctrine of the Red Army as it came to grips with the problem of future war A conscript soldier who rose through the ranks to become an officer in the Tsarist Army he saw combat in both the First World War and the Russian Civil War A student of some of the finest military specialists teaching the first generation of young Red commanders he sought to link theory and practice by using past experience to comprehend future combat *Catalogue of the University of Dakota for the Year ..., with Announcements for the Year ...* University of South Dakota,1903 *The Nature of Politics* Annette A. LaRocco,2024-04-16 This case study of Botswana focuses on the state building qualities of biodiversity conservation in southern Africa Drawing on extensive fieldwork Annette A LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era These discourses and practices invoke the ways the state exerts authority over people places and resources enacts and remakes territorial control crafts notions of ideal citizenship and identity and structures economic relationships at the local national and global levels The book s key innovation is its conceptualization of the conservation estate a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation LaRocco argues that this description is inadequate and proposes a novel and much needed alternative definition that is tied to its political elements The components of conservation control over land policing of human behavior and structuring of the authority that allows or disallows certain subjectivities render conservation a political phenomenon that can be analyzed separately from considerations of nature or wildlife In doing so it addresses a gap in the scholarship of rural African politics which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use Botswana is an ideal empirical case study upon which to base these theoretical claims With 39 percent of its land set aside for conservation Botswana is home to large populations of wildlife particularly charismatic megafauna such as the largest herd of elephants on the continent Utilizing more than two hundred interviews participant observation and document analysis this book examines a series of conservation policies and their reception by people living on the conservation estate These phenomena include securitized antipoaching enforcement a national hunting ban 2014 19 restrictions on using wildlife products forced evictions from conservation areas limitations on mobility and freedom of movement the political economy of Botswana s wildlife tourism industry and the conservation of globally important charismatic megafauna species States, Social Knowledge, and the Origins of Modern Social Policies Dietrich Rueschemeyer,Theda Skocpol,2017-03-14 From the

1850s to the 1920s laws regulating the industrial labor process pensions for the elderly unemployment insurance and measures to educate and ensure the welfare of children were enacted in many industrializing capitalist nations This same period saw the development of modern social sciences The eight essays collected here examine the reciprocal influence of social policy and academic research in comparative context ranging across policy areas and encompassing developments in Britain the United States Germany France Canada Scandinavia and Japan Introduced by the editors the essays include Part I on the emergence of modern social knowledge by Ira Katznelson Anson Rabinbach and Björn Wittrock and Peter Wagner Part II on reformist social scientists and public policymaking by Dietrich Rueschemeyer and Ronan Van Rossem Libby Schweber and John R Sutton Part III on state managers and the uses of social knowledge by Stein Kuhnle and Sheldon Garon and a conclusion by Rueschemeyer and Theda Skocpol Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Financial crises and the nature of capitalist money Jocelyn Pixley, 2013-09-12 This volume is a debate about a sociology and economics of money a form of positive trespassing It is unique in being written by scholars of both disciplines committed to this mutual venture and in starting from the original groundwork laid by Geoffrey Ingham The contributors look critically at money's institutions and the meanings and history of money creation and show the cross cutting purposes or incommensurable sides of money and its crises These arise from severe tensions and social conflicts about the production of money and its many purposes We demonstrate the centrality of money to capitalism and consider social disorders since the 2007 crisis which marks the timeliness and need for dialogue Both disciplines have far too much to offer to remain in the former damaging standoff While we are thankful to see a possible diminution of this split remnants are maintained by mainstream economic and sociological theorists who after all the crises of the past 30 years and many before still hold to an argument that money really does not matter We suggest to many different and interested audiences that since money is a promise understanding this social relation must be a joint though plural task between economics and sociology at the very least

Private Security and the Modern State David Churchill, Dolores Janiewski, Pieter Leloup, 2020-03-11 Based on extensive research in several international contexts this volume provides a nuanced assessment of the historical evolution of private security and its fluid contested and mutually constitutive relationship with state agencies public policing and the criminal justice system This book provides an overview of the history of private security provision in its multiple forms including detective agencies insurance companies moral campaigners employers associations paramilitary organizations self protection and vigilantism It also explores the historical evolution of private policing and security provision in a diverse set of

temporal national and international contexts and compares the interactions between public and private security bodies structures strategies and practices in different countries cultures and settings In doing so the volume fills the existing gaps in historical knowledge about the emergence of private and public security organizations and provides a more robust understanding of changes in the division of responsibility for security provision law enforcement and punishment between public and private institutions This wide ranging volume will be of great interest to scholars and students of history criminology sociology political science international relations security studies surveillance studies policing criminal justice and law
