English - A Changing Medium for Education Constant Leung,Brian V Street,2012-07-25 In this volume a range of authors from different international contexts argue that the notion of communicative competence in English hitherto largely referenced to metropolitan native speaker norms has to be expanded to take account of diverse contexts of use for a variety of purposes It also discusses the popular belief that language and literacy should simply be regarded as a technical skill which confers universal benefits and that it should be replaced with a social practice view that recognises situated variations and diversity This volume we believe provides a reference point for extended research and practice in these areas that will be of interest to wide range of people engaged in language and literacy education

Ethnological Publications South Africa. Native Affairs Department,1932 **Language and Institutional Identity in the Post-Apartheid South African Higher Education** Leketi Makalela,2022-03-21 This book examines the intersections between education identity formation and language in post apartheid South Africa with specific attention to higher education It does so against the backdrop of the core argument that the sector plays a critical role in shaping re producing and perpetuating sectoral class sub national and national identities which in turn in the peculiar South African setting are almost

invariably analogous with the historical fault lines determined and dictated by language as a marker of ethnic and racial identity The chapters in the book grapple with the nuances related to these intersections in the understanding that higher education language policies overt and or covert largely structure institutional cultures or what has been described as curriculum in higher education institutions Together the chapters examine the roles played by higher education by language policies and by the intersections of these policies and ethnolinguistic identities in either constructing and perpetuating or deconstructing ethnolinguistic identities upon which the sector was founded The introductory chapter lays out the background to the entire book with an emphasis on the policy and practice perspectives on the intersections The middle chapters describe the so called White Universities Black Universities and Middle Man Minorities Universities The final chapter maps out future directions of the discourses on language and identity formation in South Africa s higher education

Broadcasting and the National Question Jane Duncan,2001 *Ethnological Publications* ,1945 Primary Education in Crisis Brahm Fleisch,2008 In the past decade the national preoccupation has been on the crisis in secondary schools Lurking behind the intractable problem of low pass rates the dysfunctional schools and the small number of higher grade mathematics and science graduates is the calamity in primary education Drawing on the work of researchers in a range of fields including psychology sociology anthropology linguistics economics the health sciences and mathematics education this book documents the depth and scope of the primary education crisis and provides a comprehensive and rigorous explanation of its causes Primary education in crisis pulls together the wealth of research on health poverty resources language and teaching as factors in academic achievement in reading writing and mathematics At the centre of the book is an analysis of the published studies that systematically document what teachers teach and fail to teach and why it is that teaching is at the heart of the crisis in primary education The author suggests that there are no quick fixes but only hard choices and that for reform to succeed it must be evidence based *Implications of Information and Digital Technologies for Development*

 English abstract There are 24 languages which are regularly used by more than 44 8 million South Africans and almost 80 % of the South African population use one of the African languages at home The most commonly spoken home language is isiZulu which is spoken by 23 8 % of the population followed by isiXhosa 17 6 % and Afrikaans 13 3 % Although English is the home language of only 8 2 % of the South African population it is still used as a lingua franca throughout the nation The eleven official languages are used by 99% of the country s population and those languages are all supposed to have equal rights Belonging to these languages are English and Afrikaans and nine other African languages Sepedi Sesotho Setswana siSwati Tshivenda Xitsonga isiNdebele isiXhosa and isiZulu There are also many other languages spoken in South Africa like for example Arabic German Greek Hindi Tamil Hebrew and many more Some European languages like French German and Portuguese are used in South Africa but they are not nearly as influential as English The historical development of South Africa has brought the question of language forward The country became aware of its unique language situation and the chances and problems which are connected to it After Mandela many people developed a greater interest in smaller languages The paper is going to explore the language vitality of some of the 11 official South African languages dealing with the problem of language endangerment death and language revitalisation It is going to be seen whether the multilingualism which is propagandized by the government is or can be realised in real life Due to the lack of valid information for many of the smaller indigenous African languages the paper will mostly look at the situation of Afrikaans and English only rarely considering the other languages in much detail
