Apartheid and the Making of a Black Psychologist N. Chabani Manganyi, 2016-05-01 This intriguing memoir details in a quiet and restrained manner with what it meant to be a committed black intellectual activist during the apartheid years and beyond Few autobiographies exploring the life of the mind and the history of ideas have come out of South Africa and N Chabani Manganyi s reflections on a life engaged with ideas the psychological and philosophical workings of the mind and the act of writing are a refreshing addition to the genre of life writing Starting with his rural upbringing in Mavambe Limpopo in the 1940s Manganyi s life story unfolds at a gentle pace tracing the twists and turns of his journey from humble beginnings to Yale University in the USA The author details his work as a clinical practitioner and researcher as a biographer as an expert witness in defence of opponents of the apartheid

regime and finally as a leading educationist in Mandela's Cabinet and in the South African academy. *Apartheid and the Making of a Black Psychologist* is a book about relationships and the fruits of intellectual and creative labour. Manganyi describes how he used his skills as a clinical psychologist to explore lives both those of the subjects of his biographies and those of the accused for whom he testified in mitigation. His aim always to find a higher purpose and a higher self.

Debating African Philosophy George Hull, 2018-11-21 In African countries there has been a surge of intellectual interest in foregrounding ideas and thinkers of African origin in philosophy as in other disciplines that have been unjustly ignored or marginalized. African scholars have demonstrated that precolonial African cultures generated ideas and arguments which were at once truly philosophical and distinctively African and several contemporary African thinkers are now established figures in the philosophical mainstream. Yet despite the universality of its themes, relevant contributions from African philosophy have rarely permeated global philosophical debates. Critical intellectual excavation has also tended to prioritize precolonial thought overlooking more recent sources of home-grown philosophical thinking such as Africa's intellectually rich liberation movements. This book demonstrates the potential for constructive interchange between currents of thought from African philosophy and other intellectual currents within philosophy. Chapters authored by leading and emerging scholars recover philosophical thinkers and currents of ideas within Africa and about Africa, bringing them into dialogue with contemporary mainstream philosophy. Foreground the relevance of African theorizing to contemporary debates in epistemology, philosophy of language, moral, political philosophy, philosophy of race, environmental ethics and the metaphysics of disability. Make new interventions within on-going debates in African philosophy. Consider ways in which philosophy can become epistemically inclusive, interrogating the contemporary call for decolonization of philosophy. Showing how foregrounding Africa, its ideas, thinkers and problems can help with the project of renewing and improving the discipline of philosophy worldwide, this book will stimulate and challenge everyone with an interest in philosophy and is essential reading for upper-level undergraduate students, postgraduate students and scholars of African and African philosophy.
