### ***Standards Focus: Character Development***

#### **Chapters 1-3**

The characters in a novel or play may be revealed to the reader or audience in a variety of ways. Your main impression of a character is formed through his/her speech or actions, physical description, mannerisms, surroundings, other characters' reactions to the character, or the writer's feelings about the character. In Chapters One-Three, Hinton introduces most of the characters from the novel, and through her writing, gives the reader a good idea of each character's attitude, background, physical appearance, and overall persona. Character development is of major importance to Hinton's writing.

*Directions: To help you remember each of the characters in *The Outsiders*, fill in the following chart, detailing each individual character's physical appearance, as well as general attitude and personality type. Then, tell how each character's social environment has influenced him/her. An example has been started for you. As you proceed through the novel, you will want to add to your description of each character, so keep this activity to use as you read.*

Jr. Baldauf, 2007-10-30 One of the remarkable things about Chinese language policy over the millennia has been the power of the writing system to unite what are disparate if related spoken varieties We have already published one book on PRC language policy in this series a collection edited by Minglang Zhou that covered the full range of topics including the development of Putonghua common

speech the status of minority languages and some interesting chapters on the reform of the writing system This last subject is of such complexity and importance to justify adding to the series a book going into more detail on developments in efforts to manage and cultivate the writing system in the last 50 years taking into account the rapid growth of the Chinese economy and the technological developments associated with computers and the web It is important we feel to back up the common generalizations about language policy with detailed studies of specific topics where one can observe at close hand the plans and activities of language managers the problems they set out to solve and their successes and failures This is precisely what Zhao and Baldauf set out to do in this full account and analysis of the challenges met by recent efforts to adjust the Chinese writing system to new demands We would like to express our thanks to the authors and to the others who contributed to the production of this volume
