

When a submarine is just below the surface, sailors can use a periscope.

A *telescope* allows people to see far away into space. What does a *periscope* allow people in a submarine to do?

- 1 breathe while the submarine is underwater
- 2 see around the surface above them
- 3 travel much faster through the ocean
- 4 talk to people on land

reviewed several years of past exams and placed enfaces on the easiest and most common questions Mastering these questions should yield a 75% to 80% If a student is already achieving this percentage the other guides or web site with random questions and covering all material might be best A book might be better for your student than the web sites for two reasons 1 The more common and easiest questions are using a ruler to measure The web designers don t know the size of your computer screen and can t determine if the student has measured correctly We can get a high percentage of these problems easily 2 When studying on a computer there are too many websites with the answers With a book parents can have greater assurance the work is being done This book is developed by a trained professional out of concern It is not the product of a large publishing house It is the results of one person who wants to help Best RegardsMark Shannon **Mississippi**
