

# T-65 X-WING

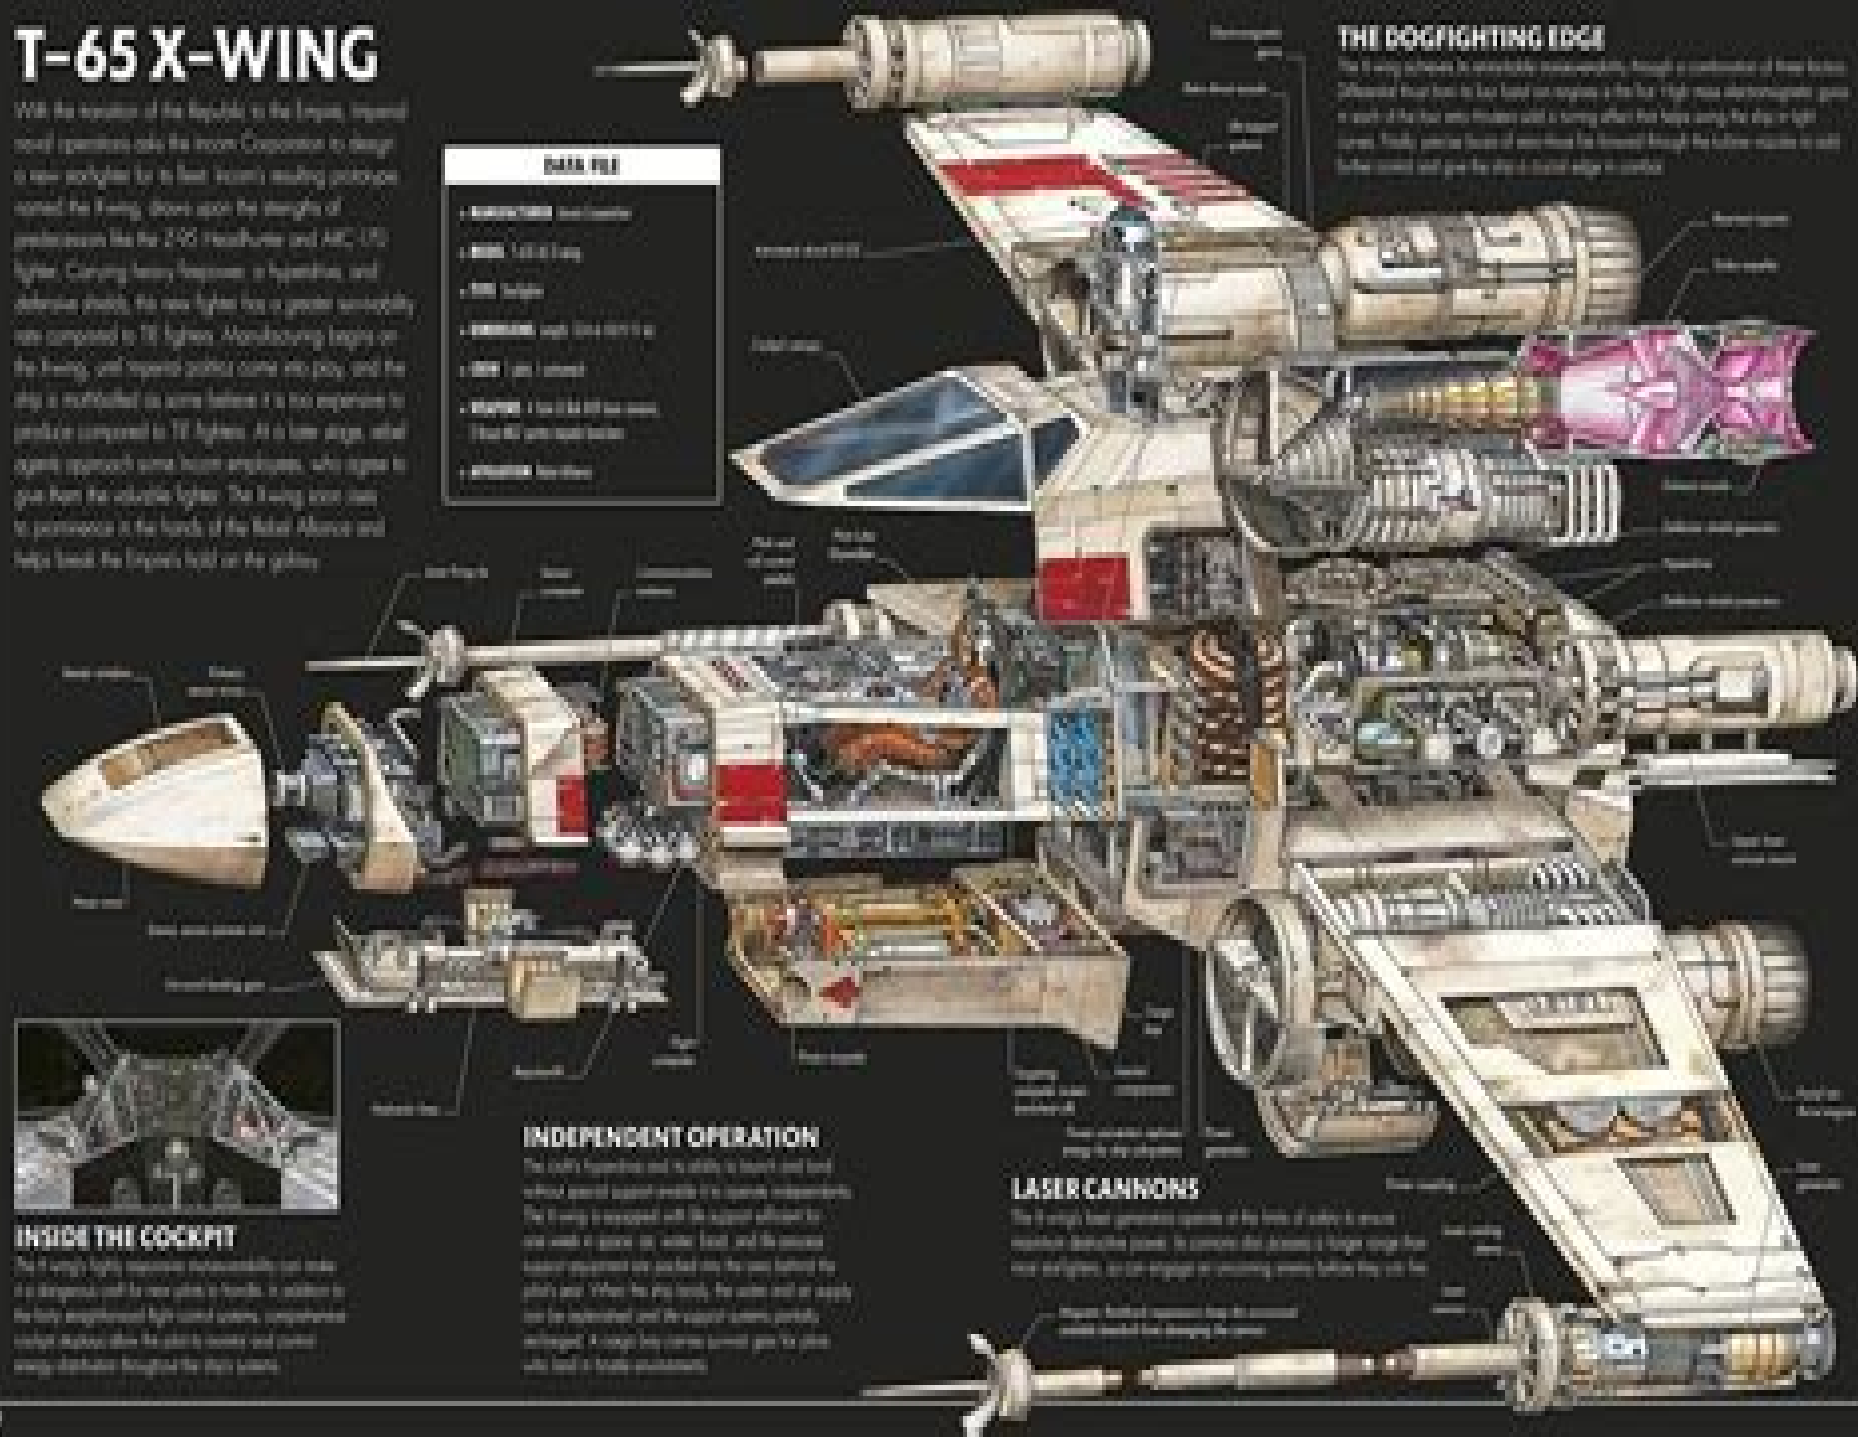

With the invasion of the Republic by the Empire, Imperial naval operations take the Incom Corporation to design a new fighter for its fleet. Yoda's leading principles inspired the X-wing, drawn upon the strengths of predecessors like the Z-95 Headhunter and ARC-170 fighter. Carrying heavy firepower, a hyperdrive, and defensive shields, the new fighter has a greater versatility rate compared to TIE fighters. Manufacturing begins on the X-wing, and Imperial orders come into play, and the ship is manufactured as soon before it is too expensive to produce compared to TIE fighters. At a later stage, rebel agents approach some Incom employees, who agree to pass from the imperial fighter. The X-wing soon flies to prominence in the hands of the Rebel Alliance and helps break the Empire's hold on the galaxy.

- **ABILITIES** None listed

## THE DOGFIGHTING EDGE

The X-wing achieves its remarkable maneuverability through a combination of three factors. Different from most in the fleet, the X-wing has high mass electromagnetic guns in each of the four main thrusters and a spring effect that helps during the ship's tight turns. Finally, precise forces of movement are focused through the hull's structure to add further control and give the ship a natural edge in combat.

## INSIDE THE COCKPIT

The X-wing's highly responsive maneuverability can make it a dangerous tool for new pilots in battle. In addition to the fully implemented light control system, comprehensive cockpit modules allow the pilots to control and control energy distribution throughout the ship's systems.

## INDEPENDENT OPERATION

The ship's responsive and its ability to launch and land without ground support provide it a unique independence. The X-wing is equipped with the support system for one week in space, no water tank, and the necessary support equipment are packed into the core behind the pilot's seat. When the ship lands, the water tank or supply can be replenished and the support system partially recharged. A single day's power control gives the ship the fuel to handle emergencies.

## LASER CANNONS

The X-wing has powerful systems of the form of laser to ensure maximum destruction power. Its cannons also possess a larger range than most fighters, so can engage an incoming enemy before they can be

Major feedback responses keep the cannons stable through the ship's movements.
