Science and Environment in Chile Javiera Barandiaran, 2018-07-31 The politics of scientific advice across four environmental conflicts in Chile when the state acted as a neutral broker rather than protecting the common good In *Science and Environment in Chile* Javiera Barandiaran examines the consequences for environmental governance when the state lacks the capacity to produce an authoritative body of knowledge Focusing on the experience of Chile after it transitioned from dictatorship to democracy she examines a series of environmental conflicts in which the state tried to act as a neutral broker rather than the protector of the common good She argues that this shift in the role of the state occurring in other countries as well is driven in part by the political ideology of neoliberalism which favors market mechanisms and private initiatives over the actions of state agencies Chile has not invested in environmental science labs state agencies with in house capacities or an ancillary network of trusted scientific advisers despite the growing complexity of environmental problems and increasing popular demand for more active environmental stewardship Unlike a high modernist empire state with the scientific and technical capacity to undertake large scale projects Chile's model has been that of an umpire state that purchases scientific advice from markets After describing the evolution of Chilean regulatory and scientific institutions during the transition Barandiaran describes four environmental crises that shook citizens trust in government the near collapse of the farmed salmon industry when an epidemic killed millions of fish pollution from a paper and pulp mill that killed off or forced out thousands of black neck swans a gold mine that threatened three glaciers and five controversial mega dams in Patagonia

Local, Traditional and Indigenous Food Systems in the 21st Century to Combat Obesity, Undernutrition and Climate Change, 2nd edition Rebecca Kanter, Sofia Boza, Gina Kennedy, 2023-07-31 Traditional and indigenous food systems have existed for centuries and were in balance with local food supplies globally

However between the mid 20th and early 21st century the green revolution dramatically altered food production which in turn affected the inclusivity of traditional production systems within food systems and subsequently traditional dietary intakes This change was accompanied by lifestyle changes and spurred a global nutrition transition Today the world faces a global syndemic of obesity undernutrition and climate change A new call to action to create food systems that nourish people and sustain the planet is needed Traditional and indigenous food systems have long been recognized as systems that can both support good human nutrition as well as maintain a balance with nature There is an underutilized knowledge base around traditional and indigenous food systems This includes the knowledge of nutritious species traditional culinary preparations and cultural practices Greater agricultural production of underutilized species can result in more sustainable agricultural and food systems which can also help improve livelihoods and food security Traditional and indigenous cultural practices with respect to both land and water management as well as culinary practices contribute to both sustainable food production and consumption These practices require a greater evidence base in order to be incorporated into public health nutrition initiatives related to improving dietary quality such as food based dietary guidelines for example An increased focus on the importance of local traditional and indigenous food systems and nutrition could therefore help countries to improve human nutrition and ideally help mitigate the global syndemic of obesity undernutrition and climate change This Research Topic will focus on documenting diverse local food systems and promoting elements within them that can help improve nutrition and health both human and planetary in various ways including the livelihood development of knowledge holders *Klamath National Forest (N.F.), Baldy Fire Recovery Project ,1990*

The Top Books of the Year State Lab Relationships And Biodiversity The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have charmed audiences this year. State Lab Relationships And Biodiversity : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. State Lab Relationships And Biodiversity : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
