In this regard, the authors draw on the works of higher education theorists such as Kuh, Tinto, Marton, and Sijm. The book is primarily a helpful resource for South African learners in school, students at universities, life orientation teachers, as well as parents of prospective university students. Government Managing Risk Bruce Chapman, 2006-09-27. Higher education rates are increasing throughout the Western world, yet at the same time, government budgets face increasing constraints. This has ensured that the importance of student support is recognized in many countries. In recent years, there has been a world-wide movement towards the use of income-contingent loans (ICL) for higher education. ICLs are now used in six countries, following the Australian innovation of 1989, with the governments of many more countries looking very seriously at the model. This impressive new book by Bruce Chapman analyzes ICLs, particularly their use in supporting students, exploring the experiences of a number of other countries adopting them. Chapman presents analysis of a number of disparate case studies to illustrate how ICLs can aid risk management policy reforming in both progressive and administratively feasible ways. This book describes, examines, and promotes an exciting new role for the public sector as a manager of risk and argues that ICLs have enormous potential to change the extent and nature of social and economic activities. With the author's experience in the design and implementation of the Australian student financial support schemes, this is a knowledgeable, informative, and enlightening book that will be useful to researchers, students, and policy makers alike.

Low-Income Students, Human Development and Higher Education in South Africa Melanie Walker, Monica McLean, 2022-07-15. This book explores learning outcomes for low-income rural and township youth at five South African universities. The book is framed as a contribution to southern and Africa-centred scholarship, adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty, and agency, to investigate opportunities and obstacles to

achieved student outcomes This approach allows a reimagining of inclusive learning outcomes to encompass the multi dimensional value of a university education and a plurality of valued cognitive and non cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship Based on capability theorising and student voices the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value The book concludes that sufficient material resources are necessary to get into university and flourish while there the benefits of a university education should be rich and multi dimensional so that they can result in functionings in all areas of life as well as work and future study the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed Low Income Students Human Development and Higher Education in South Africa makes an original contribution to capabilitarian scholarship conceptually in theorising a South based multi dimensional student well being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in depth mixed methods research on students lives and experiences in higher education in South Africa The audience for the book includes higher education researchers international capabilitarian scholars practitioners and policy makers Electronic Government and the Information Systems Perspective Andrea Kö, Enrico Francesconi, Adeleh Asemi, Gabriele Kotsis, A Min Tjoa, Ismail Khalil, 2023-07-28 This book constitutes the proceedings of the 12th International Conference on Electronic Government and the Information Systems Perspective EGOVIS 2023 which took place in Penang Malaysia during August 28 30 2023 The 8 full papers presented together with 1 short paper were carefully reviewed and selected from a total of 17 submissions They were organized in topical sections as follows e Government strategy artificial intelligence *Higher Education Financing in East and Southern Africa* Pundy Pillay, 2010-07-12 This nine country study of higher education financing in Africa includes three East African states Kenya Tanzania and Uganda five countries in southern Africa Botswana Lesotho Mozambique Namibia and South Africa and an Indian Ocean island state Mauritius Higher Education Financing in East and Southern Africa explores trends in financing policies paying particular attention to the nature and extent of public sector funding of higher education the growth of private financing including both household financing and the growth of private higher education institutions and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints This unique collection of African country case studies draws attention to the remaining challenges around the financing of higher education in Africa but also identifies good practices lessons and common themes Higher Education Financing in East and Southern Africa Pundy Pillay, 2010 This nine country study of higher education financing in Africa includes three East African states Kenya Tanzania and Uganda five countries in southern Africa Botswana Lesotho
