Bowers, 1994-06-29 This volume constitutes the proceedings of the 12th British National Conference on Databases BNCOD 12 held at Surrey Guildford in July 1994 The BNCOD conferences are thought as a platform for exchange between theoreticians and practitioners where researchers from academia and industry meet professionals interested in advanced database applications The 13 refereed papers presented in the proceedings were selected from 47 submissions they are organized in chapters on temporal databases formal approaches parallel databases object oriented databases and distributed databases In addition there are two invited presentations Managing open systems now that the Glashouse has gone by R Baker and Knowledge reuse through networks of large KBs by P M D Gray *Using Large Corpora* Armstrong-Warwick Armstrong, 1994 Using Large Corpora identifies new data oriented methods for organizing and analyzing large corpora and describes the potential results that the use of large corpora offers Today large corpora consisting of hundreds of millions or even billions of words along with new empirical and statistical methods for organizing and analyzing these data promise new insights into the use of language Already the data extracted from these large corpora reveal that language use is more flexible and complex than most rule based systems have tried to account for providing a basis for progress in the performance of Natural Language Processing systems Using Large Corpora identifies these new data oriented methods and describes the potential results that the use of large corpora offers The research described shows that the new methods may offer solutions to key issues of acquisition automatically identifying and coding information coverage accounting for all of the phenomena in a given domain robustness accommodating real data that may be corrupt or not accounted for in the model and extensibility applying the model and data to a new domain text or problem There are chapters on lexical issues issues in syntax and translation topics as well discussions of the statistics based vs rule based debate ACL MIT Series in Natural Language Processing

Handbook of Neural Computation E Fiesler, R Beale, 2020-01-15 The Handbook of Neural Computation is a practical hands on guide to the design and implementation of neural networks used by scientists and engineers to tackle difficult and

or time consuming problems The handbook bridges an information pathway between scientists and engineers in different disciplines who apply neural networks to similar problems Artificial Intelligence Today Michael J. Wooldridge, Manuela Veloso, 2007-03-06 Artificial Intelligence is one of the most fascinating and unusual areas of academic study to have emerged this century For some AI is a true scientific discipline that has made important and fundamental contributions to the use of computation for our understanding of nature and phenomena of the human mind for others AI is the black art of computer science Artificial Intelligence Today provides a showcase for the field of AI as it stands today The editors invited contributions both from traditional subfields of AI such as theorem proving as well as from subfields that have emerged more recently such as agents AI and the Internet or synthetic actors The papers themselves are a mixture of more specialized research papers and authoritative survey papers The secondary purpose of this book is to celebrate Springer Verlag's Lecture Notes in Artificial Intelligence series Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1991 Reasoning Web. Semantic Technologies for Software Engineering Uwe Aßmann, Andreas Bartho, Christian Wende, 2010-08-21 This book provides a coherent introduction to semantic web methods and research issues with a particular emphasis on reasoning It is based on a collection of six thoroughly revised tutorial papers culled from lectures given by leading researchers **Current Catalog** National Library of Medicine (U.S.), 1993

Automatic Indexing and Abstracting of Document Texts Marie-Francine Moens, 2005-12-27 Automatic Indexing and Abstracting of Document Texts summarizes the latest techniques of automatic indexing and abstracting and the results of their application It also places the techniques in the context of the study of text manual indexing and abstracting and the use of the indexing descriptions and abstracts in systems that select documents or information from large collections Important sections of the book consider the development of new techniques for indexing and abstracting The techniques involve the following using text grammars learning of the themes of the texts including the identification of representative sentences or paragraphs by means of adequate cluster algorithms and learning of classification patterns of texts In addition the book is an attempt to illuminate new avenues for future research Automatic Indexing and Abstracting of Document Texts is an excellent reference for researchers and professionals working in the field of content management and information retrieval
