World Civilizations Peter N. Stearns, 2002-02 *The Trouble with Textbooks* Gary A. Tobin, Dennis R. Ybarra, 2008-07-31

School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all

Divergent Memories Gi-Wook Shin,Daniel Sneider,2016-09-07 No nation is free from the charge that it has a less than complete view of the past History is not simply about recording past events it is often contested negotiated and reshaped over time Debate over the history of World War II in Asia remains surprisingly intense and *Divergent Memories* examines the opinions of powerful individuals to pinpoint the sources of conflict from Japanese colonialism in Korea and atrocities in China to the American decision to use atomic weapons against Japan Rather than labeling others views as distorted or ignoring dissenting voices to create a monolithic historical account Gi Wook Shin and Daniel Sneider pursue a more fruitful approach analyzing how historical memory has developed been formulated and even been challenged in each country By identifying key factors responsible for these differences *Divergent Memories* provides the tools for readers to both approach their own national histories with reflection and to be more understanding of

others **Beyond Global Crisis** Terrence Edward Paupp, 2017-09-29 In this volume Terrence Paupp critically describes the various dimensions of today's global crisis. Among other things, this volume analyzes nuclear weapons proliferation, climate change, and international lawlessness in the form of wars of aggression. Paupp argues that much human conflict and environmental degradation is the direct consequence of poverty and inequality. Until these issues are addressed, many of the world's problems will remain. Paupp asserts that around the world, peoples and nations are becoming more open to a strategy and culture of peace that evolves through discovering a commonality of interests, the value of mutual cooperation, and the desirability of forging consensus. By using various road maps and remedies supplied by noted Japanese peace activist Daisaku Ikeda and his contemporaries, viable solutions will emerge. In this new endeavor, equipped with some of the proposed solutions and strategies that this book provides, humanity will collectively become engaged in remaking the character of global governance in order to build a global culture of peace. *Resources in Education*, 2001 *The Global Age* Martin Albrow, 1997 Taking issue with those who see recent social transformations as an extension of modernity, the author contends that social theory must confront an epochal change from the modern era to a new era of globality in which human beings can conceive of forces at work on a global scale and in which they espouse values that take the globe as their reference point. The book begins by assessing the problems of writing about modernity, showing how narratives of an endlessly self-perpetuating modern age were intrinsic to the modern project: the attempt by Enlightenment philosophers to transform the everyday world in accord with science and logic under the auspices of the nation-state. Now we are beginning to realize that the nation-state and the modern project cannot renew themselves endlessly through expansion. Instead, the author contends, the age has culminated in its own dissolution, and globality has supplanted modernity as the basis for action and social organization. In theorizing the global age, he considers the worldwide environmental consequences of aggregate human activities, the reconception of human security in the age of nuclear weapons, technological advances in communication systems, the rise of a global economy, and the growing reflexivity of global consciousness as people and groups begin to refer to the globe as the frame for their beliefs. The book concludes by examining the consequences of the Global Age thesis for politics, identifying a new popular construction of the state that the author terms performative citizenship. In the modern age, the nation-state was the central power, and citizens were beneficiaries of that power with rights and duties. In the global age, citizens respond to the lack of central power by creating or performing the state themselves. The global managerial class uses the skills learned in the bureaucracy of the nation-state to bring pressure on national governments in the interests of global economic, environmental, or human rights issues. **Cosmopolitanism and Its Discontents** Lee Ward, 2020-06-23 Cosmopolitanism is one of the most venerable intellectual traditions in the history of political philosophy. From the ancient Greek Diogenes' claim to be a citizen of the world through to Kant's Enlightenment vision of a world government and even into our own time, the idea of cosmopolitanism has stirred the moral imagination of many throughout history. Arguably, the Brexit referendum result

and the election of Donald Trump in 2016 marked the first major public repudiation of the transnational globalizing cosmopolitan ideals that have arguably dominated politics in the liberal democratic West since the end of the Cold War This volume reconsiders cosmopolitanism and its discontents in the age of Brexit and Trump by bringing together the great thinkers in the history of political philosophy and contemporary reflections on the problems and possibilities of international relations human rights multiculturalism and regnant theories of democracy and the state

Demystifying Doha Ashraf M. Salama, Florian Wiedmann, 2016-05-23 Over the past decade or so the wealth produced by Qatar's oil and gas exports has generated a construction development boom in its capital city of Doha and the surrounding vicinity Since the late 1990s the number of inhabitants has grown from less than 400 000 to more than 1.7 million today In many respects Doha is portrayed as an important emerging global capital in the Gulf region which has been positioning and re-inventing itself on the map of international architecture and urbanism with a global image of building clusters of glass office towers as well as cultural and educational facilities While focusing on the architectural and planning aspects of Doha's intensive urbanization this first comprehensive examination of the city sets this within the socio-political and economic context of the wider Arabian Peninsula

Demystifying Doha: On Architecture and Urbanism in an Emerging City features a comprehensive discussion on contemporary architecture and urbanism of Doha as an emerging regional metropolis It provides a critical analysis of the evolution of architecture and urbanism as products of the contemporary global condition Issues that pertain to emerging service hubs decentralised urban governance integrated urban development strategies image making practices urban identity the dialectic relations between the city and its society and sustainable urbanism are all examined to elucidate the urban evolution and the contemporary condition of Doha

Demystifying Doha: On Architecture and Urbanism in an Emerging City concludes by suggesting a framework for future studies of the city as well as for investigating the future of similar cities setting out an agenda for sustainable urban growth while invigorating the multiple roles urban planners and architects can play in shaping this future

Designs of Destruction Lucia Allais, 2018-10-16 How historical preservation efforts to protect architectural monuments arose in the twentieth century The twentieth century was highly destructive but from its landscapes of ruins was born a new architectural type the cultural monument In the wake of World War I an international movement arose which aimed to protect architectural monuments in large numbers and regardless of style hoping not only to keep them safe from future conflicts but also to make them worthy of protection from more quotidian forms of destruction An evolving group including architects intellectuals art historians archaeologists curators and lawyers grew out of the new diplomacy of the League of Nations During and after World War II it became affiliated with the Allied Military Government and was eventually absorbed by the UN as UNESCO By the 1970s this organization had begun granting World Heritage status to a global register of significant sites from buildings to bridges shrines to city centers ruins to colossi Examining key episodes in the history of this preservation effort including projects for the Parthenon the Cathedral of St. Louis the temples of Abu Simbel

and the Bamyian Buddahs Lucia Allais demonstrates how the group deployed the notion of culture to shape architectural sites and how architecture in turn shaped the very idea of global culture Designs of Destruction emphasizes how the technical project of ensuring various buildings longevity jolted preservation into establishing a transnational set of codes values and practices At the same time this paradoxically helped integrate technologies of destruction from bombs to bulldozers into cultural governance Designs of Destruction not only offers a fascinating narrative of cultural diplomacy based on extensive archival findings it also contributes an important new chapter in the intellectual history of modernity by showing the manifold ways architectural form is charged with concretizing abstract ideas and ideals even in its destruction

Brave New Canada Derek H. Burney,Fen Osler Hampson,2014-08-01 Globalization and the shifting tectonic plates of the international system have led to an increasingly competitive world If Canada hopes to gain advantage from the dramatic developments underway it will have to aggressively adapt its foreign and domestic policies and priorities under the clear direction of the federal government or accept being left behind In Brave New Canada Derek Burney and Fen Hampson identify the key trends that are reshaping the world s geopolitics and economics and discuss the challenges Canada confronts with the rise of China and other global centres of power Their examination of a wide range of themes including the place of pluralistic democratic values in diplomacy economics and trade the ways that Canada should reset relations with its neighbour to the south as well as how to manage new global security threats paints a picture of how Canada can become bold assertive and confident and easily adjust to a new global landscape Arguing that a successful foreign policy cannot be crafted by looking at the world in the rear view mirror Brave New Canada offers evidence based provocative prescriptions for both the public and private sectors that should stimulate discussion and command widespread attention Pathways for Inter-Religious Dialogue in the Twenty-First Century Vladimir Latinovic, Gerard Mannion, Peter C. Phan, 2016-01-26 Without question inter religious relations are crucial in the contemporary age While most dialogue works on past and contemporary matters this volume takes on the relations among the Abrahamic religions and looks forward toward the possibility of real and lasting dialogue The book centers upon inter faith issues It identifies problems that stand in the way of fostering healthy dialogues both within particular religious traditions and between faiths The volume s contributors strive for a realization of already existing common ground between religions They engagingly explore how inter religious dialogue can be re energized for a new century **We Must Begin with the Land** Stephen Hunt, 2025-04-29 A polyculture of ideas decolonising reframing and transforming how we think about the things we grow through a social ecology lens
