The American Presidents From Polk to Hayes Robert A. Nowlan, Ph.D.,2016-01-31 American Presidents Polk to Hayes What They Did What They Said What Was Said About Them is the second book in a planned five volume series covering all the Presidents These 43 men so far have succeeded in some regards and failed in others as they strove to do the best they could in what is surely one of the most difficult jobs in the world Only they can truly appreciate what it takes to be the president Others can only speculate People feel strongly about U S Presidents Some they admire others they hate It is fair game to criticize a president s actions and policies However questioning their commitment to American ideals seems like hitting below the belt There are no willing villains Most people can find justification for their actions beliefs and prejudices Each president strove to do the best he could for the nation and its people This goal of the book is not to praise presidents nor is it to condemn them The subtitle of each of the five books in the series What They Did What They Said What Was Said About Them perfectly describes the approach adopted to tell their stories in a unique way meant to entertain as well as inform Readers are asked to make their own judgments of the presidencies based on more information than the semi myths they may recall History courses or what is preached in the many longstanding and despicable negative campaigning mudslinging and character assassination reports they hear from partisans One can find much to admire about each of the presidents and unfortunately much to deplore Soldiers are told that in giving salutes to officers is not honoring the individuals but rather their rank If there are presidents readers just feel they cannot salute hopefully they can salute the presidency

Scripture Versus Science : Reconciling God's Ancient Wisdom with a Modern World View Robert D. Harter, PhD, 2015-07-12 With trepidation Dr Robert D Harter approached the subject of Earth origins and human development from the position of a lifelong Christian who is also a scientist He grew up in a rural Ohio Christian family and thoroughly understands the position of those who believe the Earth and everything in it was created a few thousand years ago At the same time he is a university professor who understands the basis upon which the Earth is claimed to be millions of years old Both positions cannot be correct and it is probable that neither is completely wrong Using a scientist's analytical approach Dr Harter evaluated and compared biblical anthropological and geological records In Scripture Versus Science he proposes a resolution to the increasingly heated argument about evolution While unlikely to provide a clear and definitive answer this book begins to thin the fog that has developed around it He states There has been a lot of fog associated with whether God created the universe and everything in it or whether it just happened by chance In writing this book I attempt to show that the ideas supporting the two views are not necessarily mutually exclusive In other words I hope I have allowed a bit of sun to shine through the fog

The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within
