Operating procedures can be problematic I recently was involved in writing operating procedures for 30 machines The process was more difficult than it needed to be There were a number of interested parties each who wanted input into the SOP Each Dept seemed to have its own Silo or empire After completing the task I looked for existing publications on how to write SOP and what should be in them There were none that I could find useful I started from the ground and determined what should be in an SOP Safety record keeping start up monitoring product safety quality shutdown cleaning inspection while cleaning preventative maintenance Predictive maintenance theory error messages Trouble shooting training and assessment plans and training simulators From there it seemed logical to adopt a tree structure or scaffolding This would allow any medium type to be included into and SOP It would allow existing documents to be referred to avoid the need to re write anything just to put it into the SOP This structure allowed the use of a number of existing technologies for writing It also linked into the unit standards for training All the various silos from other dept can be incorporated because we link to the various documents from each dept Training plans and job training cards can also be very easily made The book is aimed at those who wish to learn or improve how to write standard Operating Pro

**Leadership & Management Made Easy** Benson Katulwa,2015-12-02 Students enrolled for the International Qualification in Diploma in Leadership and Management sometimes find it challenging to understand what is expected as they attempt to complete various work based assignments Sometimes the questions are not straight forward and one is never sure whether they are on the right track As a result some students give up others get stuck and demotivated and for many more it takes longer to finish the course than anticipated For that reason this guide was developed as a support tool to guide you by simplifying the questions and giving the needed suggestions to get you moving ahead To help you get the most out of this guide here are a few things you need to know and pay attention to General Expectations The nature of ILM Qualifications The ILM Diploma in Leadership and Management is a vocational qualification As such it is different from many other exams you have taken in other schools and colleges While many examinations test your ability to memorize and reproduce what you were taught this diploma tests your ability to apply your learning in your workplace For this reason the emphasis is not on the right or wrong answer but more so on the relevance of your argument to your situation The Length of each assignment has been given below the unit purpose This will range between 800 and 2500 words depending on the number of questions given in the particular assignment Pass mark for each question or Assessment Criteria AC is 50% That means if a question has been

allocated 10 marks then you need to score a minimum of 5 out of the 10 marks Scoring less than half the total mark allocation will mean the assignment will be returned to you for necessary improvement Evidence of workplace application All ILM assignments are work based meaning your response should be based on leadership and management practice in your work place Therefore the examiner of your work will be looking for evidence that you were able to apply your learning in your work place context Plagiarism is considered the worst crime one can commit in academic circles It involves using other people s ideas without acknowledging the source The punishment for plagiarism is a zero score for that paper and in extreme cases you may be discontinued from the study program
