## **Standard Operating Procedures Made Easy Write To Unit Standards:**

*Standard Operating Procedures Made Easy* David George Ward, 2014-10-21 Writing standard Operating procedures can be problematic I recently was involved in writing operating procedures for 30 machines The process was more difficult than it needed to be There were a number of interested parties each who wanted input into the SOP Each Dept seemed to have its own Silo or empire After completing the task I looked for existing publications on how to write SOP and what should be in them There were none that I could find useful I started from the ground and determined what should be in an SOP Safety record keeping start up monitoring product safety quality shutdown cleaning inspection while cleaning preventative maintenance Predictive maintenance theory error messages Trouble shooting training and assessment plans and training simulators From there it seemed logical to adopt a tree structure or scaffolding This would allow any medium type to be included into and SOP It would allow existing documents to be referred to avoid the need to re write anything just to put it into the SOP This structure allowed the use of a number of existing technologies for writing It also linked into the unit standards for training All the various silos from other dept can be incorporated because we link to the various documents from each dept Training plans and job training cards can also be very easily made The book is aimed at those who wish to learn or improve how to write standard Operating Pro      *Transfusion Medicine Made Easy For Students of Biomedical Science, Allied Medical Sciences and Medicine* Osaro Erhabor, Teddy Adias, 2012-05-31 This basic text is intended to optimise the training and practice of transfusion medicine in developing countries particularly in sub Saharan Africa It is aimed at improving the knowledge and skills of allied medical and medical students and other healthcare professionals involved in blood transfusion empowering them to offer the best possible blood transfusion services to their patients This book is suitable not only for allied medical and medical students preparing for their examination in transfusion medicine but also for postgraduates preparing for examination in general medicine haematology and transfusion science The chapters have been presented in an annotated and easy to understand format      **United States Army Aviation Digest** ,1975
