universal translator: A computer program available in the Voyager main computer. This program can analyze almost any alien language form and translate it into English and vice versa. The universal translator does not work with all language forms, and it has been known to be somewhat unreliable in cases where there has been insufficient time for the computer to analyze the alien language form.

Warp factor: The unit used to measure the speed of faster-than-light travel. Warp factor one is the speed of light. Normal cruising speed for Voyager is Warp 6. Maximum sustainable speed is Warp 9.2. No ship can achieve a speed of Warp 10, the theoretical maximum. Even at the incredible speeds afforded by warp drive, Federation space is still some 75 years away for Voyager. Returning home by normal warp travel is not an option.

warp drive: The main propulsion system of Voyager and most starships. This system enables our ship to travel faster than light, necessary because of the incredibly vast distances between stars. The Voyager warp drive is powered by a matter/antimatter reactor, controlled by dilithium crystals.

Lively, 2020-03-19 In 1995 Star Trek Voyager brought a new dynamic to Star Trek's familiar starship oriented show. Lost 70,000 light years in space, Voyager and its crew faced an uncertain and changeable future echoing anxieties felt in the United States at the time. These fifteen essays explore the context, characters, and themes of Star Trek Voyager as they relate to the culture and zeitgeist of the 1990s. Essays on gender show how the series both challenges and reinforces typical SF stereotypes through the characters of Captain Janeway, Kes, and Seven of Nine, while essays on identity examine the show's intersections with disability studies, race, and multiracial identities, family dynamics, and emerging AI and humanity. Using the epic journey of Homer's Odyssey as a starting point for the series and ending with an examination of the impacts of inception at the birth of the internet age, this book shows the many ways in which Voyager negotiated different perspectives for what the future of the galaxy and the USA could be.

Treconomics Manu Saadia, 2016-05-31 Manu Saadia has managed to show us one more reason, perhaps the most compelling one of all, why we all need the world of Star Trek to one day become the world we live in. Chris Black, Writer and Co-Executive Producer, Star Trek Enterprise. What would the world look like if everybody had everything they wanted or needed? Treconomics, the premier book in financial journalist Felix Salmon's imprint PiperText, approaches scarcity economics by coming at it backwards through thinking about a universe where scarcity does not exist. Delving deep into the details and intricacies of 24th century society, Treconomics explores post-scarcity and whether we as humans are equipped for it. What are the prospects of automation and artificial intelligence? Is there really no money in Star Trek? Is Treconomics at all possible?

More Than Meets the Eye Robert John Rehak, 2018-03-13 Introduction: Seeing past the state of the art. That which survives: design, networks, and blueprint culture between fandom and franchise. Microgenres in migration: special effects and transmedia travel. Conclusion: The effects of special effects.

Star Trek Voyager Flashback Diane Carey, 2012-07-31 A hundred years before the Starship Voyager™ was transported to the Delta Quadrant, Lieutenant Tuvok served under one of Starfleet's most famous officers, Captain Hikaru Sulu of the Starship Excelsior™. Now those days have come back to haunt him. While traveling through an uncharted nebula, Tuvok is besieged by recurring memories of his time with Captain Sulu, repressed memories that may well kill him unless their source is determined in time. To save her closest friend, Captain Kathryn Janeway follows Tuvok to the century-old bridge of the Excelsior during a desperate battle. There, Tuvok, Captain Janeway, Captain Sulu, and Commander Janice Rand must face a menace to galactic life unlike anything known before.

More Than Meets the Eye Bob Rehak, 2018-03-13 A rare look at the role of special effects in creating fictional worlds and transmedia franchises. From comic book universes crowded with soaring superheroes and shattering skyscrapers to cosmic empires set in far-off galaxies, today's fantasy blockbusters depend on visual effects. Bringing science fiction from the studio to your screen through film, television,

or video games these special effects power our entertainment industry **More Than Meets the Eye** delves into the world of fantastic media franchises to trace the ways in which special effects over the last 50 years have become central not just to transmedia storytelling but to worldbuilding performance and genre in contemporary blockbuster entertainment **More Than Meets the Eye** maps the ways in which special effects build consistent storyworlds and transform genres while traveling from one media platform to the next Examining high profile franchises in which special effects have played a constitutive role such as *Star Trek* *Star Wars* *The Matrix* and *The Lord of the Rings* as well as more contemporary franchises like *Pirates of the Caribbean* and *Harry Potter* Bob Rehak analyzes the ways in which production practices developed alongside the cultural work of industry professionals By studying social and cultural factors such as fan interaction this book provides a context for understanding just how much multiplatform storytelling has come to define these megahit franchises **More Than Meets the Eye** explores the larger history of how physical and optical effects in postwar Hollywood laid the foundation for modern transmedia franchises and argues that special effects are not simply an adjunct to blockbuster filmmaking but central agents of an entire mode of production
