Hart, Mary W. Wood, Benjamin L. Hart, 2008-02-28 Why do students continue to dissect animals in biology classes Why despite the excellence of teaching resources for veterinary and human medical education that substitute for dissection do those provided for pre college students fall short in convenience flexibility and coordination with the curriculum Why Dissection Animal Use in Education looks beyond the typical yes or no debate about dissection to understand how we came to our current practice of dissection in intermediate and high school biology even as preparation of health professionals has moved away from dissection Despite the many forces that support the continued use of dissection in pedagogy teachers retain much autonomy in how they teach in the classroom and legislation in many states provide specific requirements for what should and should not be taught in separated science and health curricula offering students the option to not engage in dissection Why Dissection walks students teachers and parents through these options to help them make more informed choices regarding their science education options Ocean Outbreak Drew Harvell, 2021-03-16 There is a growing crisis in our oceans mysterious outbreaks of infectious disease are on the rise Marine epidemics can cause mass die offs of wildlife from the bottom to the top of food chains impacting the health of ocean ecosystems as well as lives on land Portending global environmental disaster ocean outbreaks are fueled by warming seas sewage dumping unregulated aquaculture and drifting plastic Ocean Outbreak follows renowned scientist Drew Harvell and her colleagues into the field as they investigate how four iconic marine animals corals abalone salmon and starfish have been devastated by disease Based on over twenty years of research this firsthand account of the sometimes gradual sometimes exploding impact of disease on our ocean s biodiversity ends with solutions and a call to action Only through policy changes and the implementation of innovative solutions from nature can we reduce major outbreaks save some ocean ecosystems and protect our fragile environment **Course of Study and Outlines of Work of Illinois State Normal University** Illinois State University at Normal, 1893 *Principles and Methods of Toxicology, Fifth Edition* A.
