The Community Food Forest Handbook Catherine Bukowski, John Munsell, 2018-08-21 Collaboration and leadership strategies for long term success Fueled by the popularity of permaculture and agroecology community food forests are capturing the imaginations of people in neighborhoods towns and cities across the United States Along with community gardens and farmers markets community food forests are an avenue toward creating access to nutritious food and promoting environmental sustainability where we live Interest in installing them in public spaces is on the rise People are the most vital component of community food forests but while we know more than ever about how to design food forests the ways in which to best organize and lead groups of people involved with these projects has received relatively little attention In *The Community Food Forest Handbook* Catherine Bukowski and John Munsell dive into the civic aspects of community food forests drawing on observations group meetings and interviews at over 20 projects across the country and their own experience creating and managing a food forest They combine the stories and strategies gathered during their research with concepts of community development and project management to outline steps for creating lasting public food forests that positively impact communities Rather than rehash food forest design which classic books such as *Forest Gardening* and *Edible Forest Gardens* address in great detail *The Community Food Forest*

Handbook uses systems thinking and draws on social change theory to focus on how to work with diverse groups of people when conceiving of designing and implementing a community food forest To find practical ground the authors use management phases to highlight the ebb and flow of community capitals from a project s inception to its completion They also explore examples of positive feedbacks that are often unexpected but offer avenues for enhancing the success of a community food forest The Community Food Forest Handbook provides readers with helpful ideas for building and sustaining momentum working with diverse public and private stakeholders integrating assorted civic interests and visions within one project creating safe and attractive sites navigating community policies positively affecting public perception and managing site evolution and adaptation Its concepts and examples showcase the complexities of community food forests highlighting the human resilience of those who learn and experience what is possible when they collaborate on a shared vision for their community A highly useful guide based on the collective wisdom of people and communities who are defining this practice as they develop it on the ground The thoughtful analysis of planning strategies and numerous case studies of active projects help us all understand what community food forests are and can be for the future Steve Gabriel author of Silvopasture and coauthor of Farming the Woods *Environmental Health in the 21st Century* Richard V. Crume,2018-02-08 This concisely written and easy to read resource provides information on emerging issues and valuable historical context that enables students to better understand a broad range of environmental health topics from pollution to infectious diseases natural disasters and waste management As technology enables better insight into the world we live in we are increasingly aware of environmental health concerns and risks from contaminated air and water to infectious diseases and light and noise pollution Because the quality of our lives depends on the quality of our environment everyone should be informed about issues in environmental health *Environmental Health in the 21st Century From Air Pollution to Zoonotic Diseases* presents hundreds of encyclopedic entries written by expert researchers and practitioners a history of environmental health and interviews with subject experts that broadly survey the field of environmental health The set covers myriad subjects in environmental health including all types of environmental pollution the spread of communicable diseases and other issues in the health sciences waste management practices the effects of climate change on human health children s environmental health concerns environmental health problems unique to the urban environment and emerging threats such as the Zika virus and hospital acquired infections Readers will learn about steps they can take to reduce their environmental risk understand the effects of key international treaties and conventions and the contributions of key figures in environmental health and also reflect on potential solutions for global challenges in environmental pollution health sciences energy and climate waste management and the built environment No other book on the market today addresses the environmental health field in such a comprehensive manner with the latest information provided by expert practitioners all packed into two concise volumes
