

When doing a proof:

- 1.) Mark the givens on the diagram. (See what you *know*.)
- 2.) Work backwards. (Find out what you need to *prove*.)
- 3.) Try to have a *plan*. (Figure out how to get from what you know to where you need to go.)
- 4.) Write the proof.

Given: $\angle KJM \cong \angle NJL$

Prove: $\angle KJL \cong \angle MJN$

Statement And Reason Geometry Odysseyware

RAYMOND GUYAMIER

Statement And Reason Geometry Odysseyware:

Teaching Geometric Reasoning: Proof by Pictures? ,2004 The purpose of this study was to investigate students understanding of proof and proof writing using a new three column method The new three column method consists of the traditional statements and reasons columns but also contains a picture column in which students must draw a picture that corresponds to the statement It is believed that this third column will act as a blue print providing students with a visual representation of how the proof is constructed By examining this blueprint students will understand which steps are needed to complete the proof as well as the proper order of those steps Thus students develop a deeper understanding of the proof writing process The study was conducted in a suburban school in central North Carolina and involved two standard geometry classes The study lasted for a week and a half and was instituted during a chapter involving different triangle congruencies i e SAS SSS etc The three column proof was taught to a 3rd period class containing 31 students Their test and quiz scores were compared to a 2nd period class containing 23 students After examining the average quiz and average test scores for the chapter it was shown that the 3rd period class did not out score the 2nd period class Thus the use of a three column picture proof is as effective as the traditional approach An important question pursuant to this outcome is whether there are other teaching learning benefits from using picture proofs For example interviews with the cooperating teacher indicated that the three column proof was very helpful for several students and also provided good teacher feedback as to students understanding of theorems and postulates used in proof writing

DEDUCTIVE GEOMETRY RAYMOND

GUYAMIER,2013-06-26 Deductive Geometry is for students parents and teachers who need practice solving proofs in geometry Specifically where geometry is part of the 4e curriculum in a French program or for American students taking geometry between grades 8 and 10 This book shows step by step how to reason and solve geometry problems by writing solutions in a clear logical and deductive sequence This strategy is called modeling Students learn by imitating the method and eliminating all the non value adding verbiage that are distracting to the grader By showing the core steps required to solve a problem students avoid extraneous text and steps that make the solution difficult to follow and difficult for the grader to evaluate with precision The book should be used as a complement to any geometry textbook It is especially beneficial for average students with difficulties writing the solution to a problem in a logical deductive process I would recommend the user of my book to first try to solve the problems entirely before comparing with the step by step solutions following each chapter

Recognizing the way ways to get this book **Statement And Reason Geometry Odysseyware** is additionally useful. You have remained in right site to start getting this info. get the Statement And Reason Geometry Odysseyware associate that we give here and check out the link.

You could purchase lead Statement And Reason Geometry Odysseyware or acquire it as soon as feasible. You could speedily download this Statement And Reason Geometry Odysseyware after getting deal. So, subsequently you require the book swiftly, you can straight acquire it. Its thus unquestionably simple and appropriately fats, isnt it? You have to favor to in this flavor
