

100

100

Other studies of adolescents (e.g., van der Werf, 2003) have found that, although adolescents are more likely to be involved in sexual activity, they are less likely to be involved in sexual activity that is planned, longer-term, and intended for pleasure. Thus, the results of the first two studies are consistent.

100

Indigenous communities and the national government have been engaged in a process of negotiation of the use of natural resources. The process is an attempt to find a common ground.

100

The two models estimate the probability of being infected with a given parasite given each of the host types. The model compares the risk of infection for each host type based on the probability of being infected with a given parasite given each of the host types.
