An Introduction to Search Engines and Web Navigation Mark Levene, 2011-01-14 This book is a second edition updated and expanded to explain the technologies that help us find information on the web. Search engines and web navigation tools have become ubiquitous in our day to day use of the web as an information source, a tool for commercial transactions and a social computing tool. Moreover, through the mobile web we have access to the web's services when we are on the move. This book demystifies the tools that we use when interacting with the web and gives the reader a detailed overview of where we are and where we are going in terms of search engine and web navigation technologies.

Search Engine Society Alexander Halavais, 2013-04-25 Search engines have become a key part of our everyday lives. Yet while much has been written about how to use search engines and how they can be improved, there has been comparatively little exploration of what the social and cultural effects might be. Like all technologies, search engines exist within a larger political, cultural, and economic environment. This volume aims to redress this balance and to address crucial questions such as: How have search engines changed the way we organize our thoughts about the world and how we work? What are the search engine wars, what do they portend for the future of search, and who wins or loses? To what extent does political control of search engines or the political influence of search engines affect how they are used, misused, and regulated? Does the search engine help shape our identities and interactions with others, and what implications does this have for privacy? Informed members of the information society must understand the social contexts in which search engines have been developed, what that development says about us as a society, and the role of the search engine in the global information environment. This book provides the perfect starting point.

Invisible Search and Online Search Engines Jutta Haider, Olof

Sundin,2019-03-04 Invisible Search and Online Search Engines considers the use of search engines in contemporary everyday life and the challenges this poses for media and information literacy Looking for mediated information is mostly done online and arbitrated by the various tools and devices that people carry with them on a daily basis Because of this search engines have a significant impact on the structure of our lives and personal and public memories Haider and Sundin consider what this means for society whilst also uniting research on information retrieval with research on how people actually look for and encounter information Search engines are now one of society s key infrastructures for knowing and becoming informed While their use is dispersed across myriads of social practices where they have acquired close to naturalised positions they are commercially and technically centralised Arguing that search searching and search engines have become so widely used that we have stopped noticing them Haider and Sundin consider what it means to be so reliant on this all encompassing and increasingly invisible information infrastructure Invisible Search and Online Search Engines is the first book to approach search and search engines from a perspective that combines insights from the technical expertise of information science research with a social science and humanities approach As such the book should be essential reading for academics researchers and students working on and studying information science library and information science LIS media studies journalism digital cultures and educational sciences Search Engines for Children Tatiana
