Economics and World History Paul Bairoch,1995-09 Paul Bairoch deflates twenty commonly held myths about economic history Among these myths are that free trade and population growth have historically led to periods of economic growth and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States Europe and the

Third World and he re examines the facts to set the record straight Bairoch argues that until the early 1960s the history of international trade of the developed countries was almost entirely one of protectionism rather than a Golden Era of free trade and he reveals that in fact past periods of economic growth in the Western World correlated strongly with protectionist policy He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries as some economists and many politicians have held Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution the effects of the economic development of the West on the Third World and beliefs about the 1929 crash and the Great Depression Bairoch s lucid prose makes the book equally accessible to economists of every stripe as well as to historians political scientists and other social scientists

2012 building off work first published in 2010 the Resolution Project proposed that a new Chapter 14 be added to the Bankruptcy Code exclusively designed to deal with the reorganization or liquidation of the nation's large financial institutions. In *Making Failure Feasible* the contributors expand on their proposal to improve the prospect that our largest financial institutions particularly with prebankruptcy planning could be successfully reorganized or liquidated pursuant to the rule of law and in doing so both make resolution planning pursuant to Title I of Dodd Frank more fruitful and make reliance on administrative proceedings pursuant to Title II of Dodd Frank largely unnecessary. This book highlights the problems of dealing with large financial institutions in distress and Chapter 14's responses to those twin issues. The contributors first outline the basic features of Chapter 14 and point to their continuation as well as additional features to ensure the quick resolution of large financial institutions that would not depend on government discretion and would mesh with emerging ideas about cross border resolution. The remaining chapters provide the context for reform and show how Chapter 14 as envisioned in this book would be a substantial advance on administrative focused resolution procedures.
