1992 with the sponsorship of the Music Educators National Conference MENC was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field. This new companion volume again with the sponsorship of MENC explores the significant changes in music and arts education that have taken place in the last decade. Notably several chapters now incorporate insights from other fields to shed light on multi-cultural music education, gender issues in music education and non-musical outcomes of music education. Other chapters offer practical information on maintaining musicians' health, training music teachers and evaluating music education programs. Philosophical issues such as musical cognition, the philosophy of research, theory, curriculum and educating musically are also explored in relationship to policy issues. In addition to surveying the literature, each chapter considers the significance of the research and provides suggestions for future study. Covering a broad range of topics and addressing the issues of music education at all age levels from early childhood to motivation and self-regulation, this handbook is an invaluable resource for music teachers, researchers and scholars.

It deserves a place in the library of every university and every social science and health department. This collection interrogates the representation of humanitarian crisis, catastrophe and care. Contributors explore the refraction of humanitarian intervention from the mid-twentieth century to the present across a diverse range of media forms including screen media, film, television and online video, newspapers, memoirs, music, festivals and social media platforms, notably Facebook, YouTube and Flickr. Examining the historical, cultural and political contexts that have shaped the mediation of humanitarian relationships since the middle of the twentieth century, the book reveals significant synergies between the humanitarian enterprise, the endeavour to alleviate the suffering of particular groups and its media representations, particularly in their modes of addressing and appealing to specific publics.

**Third World Resources**, 1990 *Free Trade and Cultural Diversity in International Law* Jingxia Shi, 2013-04-30 This book attempts to reconcile the concept of free trade with a key non-trade social value: cultural diversity in an era of economic globalisation. It first shows how we can look at culture in many different ways and explains why we should care about cultural diversity. The book then examines the challenges that policymakers are faced with in formulating

cultural measures in the new media environment and analyses UNESCO's theories and approaches to cultural diversity. This is followed by a comprehensive examination of the treatment of culture in global and regional trade agreements including the framework of the GATT-WTO system, the WTO's judicial practice involving cultural products and the treatment of culture under the EC, EU and NAFTA. This identifies the challenges trade norms encounter in dealing with cultural products. The author seeks to formulate a balanced view of the challenge of protecting and promoting cultural diversity while also recognising the important goal of trade liberalisation. To this end, Professor Shi proposes a dual method through which the norms found in WTO agreements and in UNESCO cultural instruments may be brought into alignment: the first highlighting the compatibility of cultural policy measures with trade obligations on a domestic level; the second suggesting potential linkages between the WTO rules and the UNESCO Convention from the perspectives of treaty interpretation. **DHEW**
