The Geography of Wine Percy H. Dougherty,2012-01-02 Wine has been described as a window into places cultures and times Geographers have studied wine since the time of the early Greeks and Romans when viticulturalists realized that the same grape grown in different geographic regions produced wine with differing olfactory and taste characteristics This book based on research presented to the Wine Specialty Group of the Association of American Geographers shows just how far the relationship has come since the time of Bacchus and Dionysus Geographers have technical input into the wine industry with exciting new research tackling subjects such as the impact of climate change on grape production to the use of remote sensing and Geographical Information Systems for improving the quality of crops This book explores the interdisciplinary connections and science behind world viticulture Chapters cover a wide range of topics from the way in which landforms and soil affect wine production to the climatic aberration of the Niagara wine industry to the social and structural challenges in

Encyclopædia Biblica Thomas Kelly Cheyne, John Sutherland Black, 1899 *Schools and Informal Learning in a Knowledge-Based World* Javier Calvo de Mora, Kerry J. Kennedy, 2019-09-19 This book has two purposes To open up the debate on the role of informal education in schooling systems and to suggest the kind of school organizational environment that can best facilitate the recognition of informal learning Successive chapters explore what is often seen as a duality between informal and formal learning This duality is particularly so because education systems expend so much time and effort in certifying formal knowledge often expressed in school subjects reflecting academic disciplines Recognizing the contribution informal learning can make to young people s understanding and development does not negate the importance of valued social knowledge That complements it Students come to school with knowledge learnt from their families peers the community and both traditional and social media They should not have to unlearn this in order to enter the world of formal learning Rather students different learning worlds should be integrated so that each informs the other In a knowledge based society all learning needs to be valued Some contributors to this book reflect on how new educational systems could be created in a move away from top down authoritarian and bureaucratic management Such open systems are seen to be more welcoming in acknowledging the importance of informal learning Others provide practical examples of how informal learning is currently recognized Some attention is also paid to the evaluation of informal learning A key objective of the work presented here is to stimulate debate about the role of informal learning in knowledge based societies and to stimulate thinking about the kind of reforms needed to create more open and more democratic school learning environments
