but do not abandon the epistemic distinctiveness of facts Bringing clarity and order to the discussion by disclosing both key commonalities and significant differences between the ways we talk about facts and explanations Patrick Thaddeus Jackson argues that although intrinsically more contestable than facts social scientific explanations can nonetheless be related to them in ways that allow researchers to evaluate explanations based on whether and to what extent they accord with the relevant facts in each situation Ardently defending a pragmatist account of knowledge that has no patience with either alternative facts or anything goes relativism the author develops a set of concepts that enables tricky philosophical problems to be dissolved After examining facts causal explanations and interpretive explanations the book culminates in an account of the priority of interpretation in the evaluation of any explanation and any seemingly factual claim Defining the terms of the debate and grounding better conversations about the issues this book will appeal to all scholars interested in the philosophy and methodology of the social sciences international studies international relations security studies and anyone teaching or studying research methods

Secret Weapons and World War II Walter E. Grunden,2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and

military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East

Beyond Expectations Frank Forsberg, 2011-10 Like a flower or maybe a tenacious weed Frank Forsberg managed to thrive in the arid soil of the Great Depression Not that it was easy Surely traveling in a boxcar with hobos couldn't have given sixteen year old Forsberg reason to expect much of the future But not only would he retire a Navy captain he'd find love friendship and adventure along the way After a slight detour through the school system Forsberg found his way to the Navy where he received an unexpected lifelong education His Navy career spanned three wars and saw America go through profound changes from the unanimous support of World War II to the divisiveness of the Korean War and the Vietnam War As a pilot Forsberg faced challenges that would test his skills and resolve which ultimately strengthened his character He also accepted what may be the even more harrowing mission of starting a family something no amount of training could have prepared him for The kid that set out across the country with just over a dollar couldn't have known it at the time but he was embarking on the American dream Beyond Expectations is an exciting chronicle of that adventure a saga of facing seemingly impossible situations and living to laugh about it It's been a wild ride so far And that's just the first 90 years

Beyond the Crash Gordon Brown, 2010-12-07 The international financial crisis that has held our global economy in its grip for too long still seems to be in full stride Former British Prime Minister and Chancellor of the Exchequer Gordon Brown believes the crisis can be reversed but that the world's leaders must work together if we are to avoid a decade of lost jobs and low growth Brown speaks both as someone who was in the room driving discussions that led to some crucial decisions and as an expert renowned for his remarkable financial acumen No one who had Brown's access has written about

the crisis yet and no one has written so convincingly about what the global community must do next in order to climb out of this abyss Brown outlines the shocking recklessness and irresponsibility of the banks that he believes contributed to the depth and breadth of the crisis As he sees it the crisis was brought on not simply by technical failings but by ethical failings too Brown argues that markets need morals and suggests that the only way to truly ensure that the world economy does not flounder so badly again is to institute a banking constitution and a global growth plan for jobs and justice Beyond the Crash puts forth not just an explanation for what happened but a directive for how to prevent future financial disasters Long admired for his grasp of economic issues Brown describes the individual events that he believes led to the crisis unfolding as it did He synthesizes the many historical precedents leading to the current status from the 1933 London conference of world leaders that failed to resolve the Great Depression to the more recent crash in the Asian housing market Brown s analysis is of paramount importance during these uncertain financial times As Brown himself said of his ideas for the future We now live in a world of global trade global financial flows global movements of people and instant global communications Our economies are connected as never before and I believe that global economic problems require global solutions and global institutions In writing my analysis of the financial crisis I wanted to help explain how we got here but more important to offer some recommendations as to how the next stage of globalization can be managed so that the economy works for people and not the other way around The crisis exposed the contradiction of globalization itself as economies have become more interconnected regulators and governments have failed to keep pace and increase coordination It is a failure intrinsic to unregulated global markets an instability that resulted from the manner in which increasing flows of capital around the world happened and impacted the economy And it is a failure of collective action at an international level to respond quickly enough to the structural imbalances and inequities that arose At its simplest then this is the first true crisis of globalization For the first time everybody from the richest person in the richest city to the poorest person in the poorest slum was affected by the same crisis Although its roots are global its impact is local directly felt on nearly every main street on nearly every shop floor around nearly every kitchen table Billions of people around the world are in need of and are demanding a better globalization It is the nature of power that you always leave tasks unfinished when you leave office It is the nature of politics that the argument must continue This book is my warning of a decade of lost growth and my answer to that fear with a call for a better globalization It is an explanation of a pattern in the numbers that points to an enormous opportunity to alleviate poverty create jobs and grow A future of low growth high unemployment decline and decay is not inevitable it s about the change we choose From Beyond the Crash **Hearings, Reports and Prints of the House Committee on Armed Services** United States.
