The Goldilocks Map: A classroom teacher's quest to evaluate 'brain-based' teaching advice Andrew C. Watson, 2021-05-03 In the last 20 years the cognitive sciences have revealed fresh surprising and useful insights into how and why our students learn Teachers can now draw on psychology and neuroscience research to supplement reconsider even overturn our traditions and training To use this research most wisely teachers must find our way to an elusive Goldilocks Zone Instead of resisting all research based guidance we should be ready to take it to heart even when it challenges both our training and conventional wisdom Instead of accepting all research based guidance we should be ready to reject it emphatically especially the hyped up edu fads that exaggerate and misinterpret psychology findings How can we get this Goldilocks balance just right This book offers a specific practical quest map to discover just such a balance By critically examining the source the research and ourselves teachers can develop the skills necessary to be effective research skeptics Written by a teacher with 18 years in the classroom and 13 years studying neuroscience and psychology The Goldilocks Map transforms brain research from a daunting monologue into an approachable exciting and lively conversation
