This guide is a must for anyone who wants to join the growing ranks of 21st Century backyard radio astronomers. The first part of the book provides background material and explains in a non-mathematical way our present knowledge of the stronger radio sources those observable by amateurs including the Sun, Jupiter, Meteors, Galactic and extra-galactic sources. The second part of the book deals not only with observing but assuming no prior technical knowledge of electronics or radio theory, takes the reader step by step through the process of building and using a backyard radio telescope. There are complete detailed plans and construction information for a number of amateur radio telescopes, the simplest of which can be put together and working using only simple tools in a weekend. For other instruments, there are full details of circuit board layouts, components to use and vitally important in radio astronomy, how to construct antennae for radio astronomy.
