Deutsch, 2008-01-24 The return of the congress to North America after 20 years of absence could not have been in a more ideal location The beauty of Banff and

the many offerings of the Rocky Mountains was the perfect background for a week of interesting and innovative discussions on the past present and future of geostatistics The congress was well attended with approximately 200 delegates from 19 countries across six continents There was a broad spectrum of students and seasoned geostatisticians who shared their knowledge in many areas of study including mining petroleum and environmental applications You will find 119 papers in this two volume set All papers were presented at the congress and have been peer reviewed They are grouped by the different sessions that were held in Banff and are in the order of presentation These papers provide a permanent record of different theoretical perspectives from the last four years Not all of these ideas will stand the test of time and practice however their originality will endure The practical applications in these proceedings provide nuggets of wisdom to those struggling to apply geostatistics in the best possible way Students and practitioners will be digging through these papers for many years to come Oy Leuangthong Clayton V Deutsch
