Social Identity and Working Class Support for the Populist Radical Right Eric G. Castater,Kyung Joon

Han,2025-02-04 Why are blue collar workers increasingly supporting the populist radical right in Western Europe Previous explanations for this phenomenon suggest that it is the result of their economic and cultural grievances and their general discontent towards the political system Social Identity and Working Class Support for the Populist Radical Right argues that these explanations are unable to account for why the working class despite their deteriorating economic position in recent decades would prefer to vote for a party family that they agree with more on cultural issues the populist radical right than economic issues the populist radical or mainstream left To explain this puzzle the book develops a theory utilizing the

literature on social identity It argues and empirically finds that political and economic conditions relatively unfavourable to the working class increase blue collar worker support for the populist radical right in Western Europe by strengthening these workers national identity and thus also the salience they place on cultural issues Castater and Han s analysis suggests that if governing parties desire to reduce support for the populist radical right they should incorporate labour organizations into the welfare state reform process enact economic policies that improve the well being of a broad swath of the working class and reduce the types of economic inequality that most affect blue collar workers *Sentencing Matters* Michael H. Alienation From Schooling (1986) Peter Fensham,2018-01-17 Originally published in 1986 this book presents three full case studies of secondary school communities in Australia one city school in a working class area one community school serving a wide more rural area and a school with an academic tradition in the suburbs of a large city The material is drawn together to discuss and describe the issues revealed by the studies these include discipline boredom staff student relations and the relevance of school work to the outside world The book includes interviews with both students and teachers recording the reactions of students to the way they are being taught and their views on whether it is worth working hard at school when there is no certainty of a job at the end of it The philosophy of the teachers emerges in the interviews as do their views on the prospect of changing students attitudes from those acquired at home and on the need for vocational rather than academic courses What also comes out in the interviews is their realistic attitudes to their students future job prospects and their views on alternative courses which could prepare the pupils for life rather than for a specific job The book also includes an account of how the case studies were undertaken and reported The methodological chapters set out some of the dilemmas and the possibilities in the study of such complex human situations

[The Fifth Dimension](#) Michael Cole,Distributive Literacy Consortium,2006-10-19 The significant increase in the number of working mothers over the last

twenty years has led to widespread worries about the plight of latchkey kids who return from school each day to empty homes. Concerned that unsupervised children might be at greater risk of delinquency, schools and communities across the nation began providing after school activities. But many of these programs were hastily devised with little understanding of what constitutes a quality program that meets children's developmental needs. The Fifth Dimension explores and evaluates one of the country's most successful and innovative after school programs, providing insightful and practical lessons about what works and doesn't work after school. The Fifth Dimension program was established in the 1980s as a partnership between community centers and local colleges to establish an educational after school program. With an emphasis on diversity and computer technology, the program incorporates the latest theories about child development and gives college students the opportunity to apply their textbook understanding of child development to real learning environments. The Fifth Dimension explores the design, implementation, and evaluation of this thriving program. The authors attribute the success of the Fifth Dimension to several factors. First, the program offers a balance of intellectually enriching exercises with development-enhancing games. Second, by engaging undergraduates as active participants in both learning and social activities, the program gives local community organizations a large infusion of high-quality help for their educational efforts. Third, by rewarding children for their achievements and good behavior with greater flexibility in choosing their own schedules, the Fifth Dimension acts as a powerful enduring motivator. The Fifth Dimension program serves as a model for what an enriching after school program can be. The product of years of innovation and careful assessment, The Fifth Dimension is a valuable resource for all who are interested in developing successful community-based learning programs.
