

The Analysis Of The Film "The Matrix"

The Matrix was a revolutionary movie that commented on technological reliance and used lighting, special effects and camera angles to add intrigue to the storyline. It tells of the dangers of technology and shows a worst-case story about what could happen if the technology created by humans became so powerful that it overtook the human race.

The movie The Matrix tells a very interesting story about what the world would look like if the technology created by humans became so advanced it overtook and began to control the humans. It is a very ironic twist that the humans become like slaves to the technology they created to serve them. It is also interesting how the protagonists in the story must use technology in the form of training modules in order to defeat the powerful technology that is ruling over the world. However, there is still the human element of being able to use their human brains to understand to world around them and outsmart the artificial intelligence. It is a cautionary tale, but still has a hopeful ending message that the human element will still be essential no matter what.

An example of when lighting is used to help tell the story is near the beginning of the movie. When Neo is first seen in his office building, the lighting is bland and slightly dim, but much brighter than it had been at any location before this scene. This shows the contrast between the two lives lived by Neo. When he is involved in his secret hacker lifestyle, everything is dark and there are shadows everywhere. This creates a very mysterious mood and illustrates the aspect of secrecy about how Neo lives his life. When he is seen in the office of his boss, it is the first well lit scene and is portrays the boring, bland everyday lifestyle that Neo is stuck in during the day. This contrast in

Phillip Novak, 2020-07-31 This book argues that the sustained interpretation of individual movies has contrary to conventional wisdom never been a major preoccupation of film studies that indeed the field is marked by a dearth of effective engaging and enlightening critical analyses of single films The book makes this case by surveying what has been written about four historically important and well known movies D W Griffith's *Way Down East* Marcel Carné's *Port of Shadows* Mike Nichols's *The Graduate* and Michelangelo Antonioni's *Red Desert* none of which has been the focus of sustained critical attention and

by exhaustively examining the kinds of work published in four influential film journals Cinema Journal Screen Wide Angle and Movie The book goes on to argue for the value of the work of interpretation illustrating this value through extended analyses of Roman Polanski's Chinatown and Christopher Nolan's Memento both of which thematize interpretation Novak demonstrates the causes and consequences of reading poorly and the importance of reading well **Siegfried Kracauer's American Writings** Siegfried Kracauer, 2012-06 We know Siegfried Kracauer as a brilliant Weimar essayist a Frankfurt School fellow traveler and a pioneering postwar film theorist This collection of his American writings uncovers fascinating corners of his film and cultural criticism firmly placing him in the context of the New York Intellectuals as well Peter Decherney author of Hollywood's Copyright Wars From Edison to the Internet Intelligent Systems Siba K.
