Web Personalization in Intelligent Environments Giovanna Castellano,Anna Maria Fanelli,2009-09-30 At first sight the concept of web personalization looks deceptively simple A web personalization system is a software component that collects information on visitors to a web site and leverages this knowledge to deliver them the right content tailoring presentation to the user's needs All over the world web designers and web content managers rely on web personalization

solutions to improve the effectiveness and ability of their web based applications Still the scientific foundation of web personalization remains a controversial issue Practitioners know very well that when properly implemented personalization delivers a much better user experience but when it is poorly implemented personalization may backfire and even distract the user's attention away from some useful and costly to develop enriched content In other words tailoring content and varying it routinely may make a site more attractive but an unstable site look can have a negative impact on the overall message Everybody seems to agree that this is a real danger but there are specific questions that are much harder to answer convincingly
